

RESIDUAL VEGETATION KILLER IS A NON-SELECTIVE HERBICIDE THAT ACTS BOTH THROUGH FOLIAR CONTACT AND THROUGH THE ROOTS. THUS ITS EFFECTIVENESS IS DEPENDENT UPON RAINFALL TO MOVE IT INTO THE ROOT SYSTEM. SINCE THIS PRODUCT USUALLY INHIBITS PLANT GROWTH FOR AT LEAST A YEAR, RESIDUAL VEGETATION KILLER SHOULD BE USED ONLY IN AREAS WHERE COMPLETE CONTROL OF VEGETATION IS REQUIRED.

IMPORTANT: Read the entire Directions for Use and the Conditions of Sale and Warranty before using this product.

DIRECTIONS FOR USE

Using a backpack sprayer, pump-up hand sprayer, or an ordinary backpack uniformly spray 2 - 3 gals. per 1,000 sq. ft. of foliage. For control of foliage, insure contact action. Best results are obtained when applications are made during or soon after weed emergence while growth is active. Where vegetation is tall and dense, use 5 gals. per 1,000 sq. ft. (200 gals. per acre). For control of hard-to-kill perennial weeds and grasses such as Johnson-grass, Bindweed, and Wild Carrot, use 8-12 gals. per 1,000 sq. ft. Although Residual Vegetation Killer has considerable activity through foliar contact, much of its activity is through the roots and, therefore, adequate rainfall to move the chemical into the root zone is necessary.

Under conditions where the rainfall is high and the growing season long, one application may be necessary to remove weed from soil surface.

Take care to keep this product well away from desirable plants and ornamentals. Do not apply over desirable plants or ornamentals. Do not apply to plants or ornamentals. Do not apply to plants or ornamentals. Do not apply to plants or ornamentals.

DO NOT DRINK OR RETURN TO MOUTH. CONTAINER TO BE DESTROYED BY PERFORMING THE FOLLOWING OPERATIONS: 1. POUR INTO A CONTAINER OF WATER. 2. DESTROY.

RESIDUAL VEGETATION KILLER

For non-selective weed control on non-cropland areas such as railroad sidings, rights-of-way, recreational areas, drainage-ditch banks, roadways, fence rows, parking lots, and other similar areas.
