

Granular Herbicide is a non-selective herbicide, to be used for controlling a wide range of annual and perennial weeds and grasses on such non-cropland areas as parking lots, rights-of-way, industrial sites, fence rows, around storage facilities, railroad tracks, and other similar areas where vegetation may prove a hazard or a nuisance. This material is a semi-soil sterilant, and will kill all types of vegetation, however, the degree of vegetation control will vary with the amount of herbicide applied, rainfall, soil type, and other conditions.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Do not stock more than four containers high. Leaking or damaged containers should be placed in overpack drums for disposal. Spills should be collected and disposed of in a sanitary landfill. Keep container closed when not in use. Store away from fertilizers, food, seed, and insecticides.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Completely empty liner by shaking and tapping sides and bottom to loosen clinging particles. Empty residue into application equipment. Then dispose of liner in a sanitary landfill or by incineration if allowed by State and local authorities. If drum is contaminated and cannot be reused, dispose of in the same manner.

This material may be applied at any time of year, except when ground is frozen. The best time for application is in early spring when the vegetation is actively growing. Apply uniformly at the rate of 0.5# to 1# per 100 sq. ft. (200# - 400# per acre) with common seeders, fertilizer spreaders, or similar equipment. Avoid drift to desirable trees and shrubs. Since this product works through the root systems, adequate rainfall is necessary to carry the material into the soil and to the root zone of the vegetation. Once the area is under control, annual light applications (0.25# to 0.50# per 100 sq. ft.) will keep the area free of vegetation.

NOTICE

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or he

handling of this material when used, use and/or handling is contrary to label instructions.

GRANULAR HERBICIDE

ACTIVE INGREDIENTS:

Bromacil (5-bromo-3-sec-butyl-4-methylurea)

INERT INGREDIENTS:

Conforms with PR Notice 82-2
Based on Draft Labeling Dated

CAUTION

This material is a semi-soil sterilant, and kills all types of vegetation. Do not apply near any area where desirable trees, shrubs, or grass may be growing. Do not apply to areas where roots of desired vegetation may extend. Do not store near fertilizers, seeds, insecticides, or fungicides. Do not store near feed or feedstuffs. Thoroughly clean spreading equipment after use.

Avoid contamination of waters intended for irrigation or domestic purposes. Keep out of lakes, streams, or ponds. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.

May cause irritation to skin and eyes. Avoid contact with skin, eyes, and clothing. Avoid breathing dust. May irritate nose and throat. In case of contact, wash skin with soap and water for 15 minutes and seek medical attention. Contaminated clothing should be washed before reuse. Do not take internally.
