

Cameraman's Note

Poor Copy

DIRECTIONS FOR USE

Apply this algacide when the system is in jeopardy of becoming affected or after cleaning system whose efficiency is already impaired.

INITIAL DOSE: 2 gallons Algaecide to each 5,000 gallons of water contained in the system (20-40 ppm active quaternaries). Repeat until control is evident.

PERIODIC DOSE: When system is in control, add 1 - 3 quarts of Algaecide to each 5,000 gallons of water (5-15 ppm active quaternaries) contained in the system every 7 days or sooner should visible growth appear.

For best results, clean heavily contaminated systems before treatment with this product. If soap or anionic detergent is used, rinse thoroughly before charging with the algacide. Apply product at a point in the system where uniform mixing will take place.

Do not be alarmed with the sudden appearance of organic debris in the system during the first week of operation. This is normal and is a good indication that the product has effectively penetrated and dislodged dead organic material which tenaciously adheres to metal and wooden surfaces as living matter. This debris should be removed from the system to avoid clogging of screens and pipes.

FISH AND/OR WILDLIFE PRECAUTIONS

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public waters. Apply this product only as specified on this label.

WATER COOLING TOWER ALGAECIDE

HELPS KEEP WATER COOLING TOWER SYSTEMS CLEAR AND FREE OF VISIBLE ALGAE SLIMES.

ACTIVE INGREDIENTS:

n-Alkyl (60% C ₁₄ , 30% C ₁₆ , 5% C ₁₂ , 5% C ₁₈)	
dimethyl benzyl ammonium chlorides	5%
n-Alkyl (68% C ₁₂ 32% C ₁₄) dimethyl	
ethylbenzyl ammonium chlorides	5%

INERT INGREDIENTS:	90%
	100%

When this product is used as directed it will aid in controlling and or preventing the development of unsanitary algae slime conditions which are unsightly, produce foul odors and which are often the cause of equipment breakdown.

This algacide is compatible with virtually all corrosion inhibition additives, but should not be used in the presence of soap or other anionic detergents. This product, at use dilution, is non-corrosive to inanimate hard surfaces.

DANGER: Keep Out of Reach of Children. Corrosive. Causes eye damage and skin irritation. Do not get in eyes, on skin or on clothing. Protect eyes and skin when handling. Harmful if swallowed. Avoid contamination of food.

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution or, if these are not available, drink large quantities of water. Call a physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

Rinse empty container thoroughly with water before discarding or returning to drum conditioner.
