This product should not be applied directly but should be diluted by adding 10 gallons of the concentrate to 33.5 gallons of phytotoxic oil vehicle and mix thoroughly. To control most weeds and grasses for extended periods on non-cropland areas such as industrial plant sites, parking lots, loading ramps and around storage buildings and similar non-crop areas apply 1.5 to 7 gallons per 1000 square feet of diluted liquid after the most predominant weeds have emerged. Thoroughly wet weeds to point of run off. No agitation is required. The diluted liquid can be applied with standard spray equipment. For treating small areas, a tank type hand sprayer or sprinkling can may be used. Apply when weeds are young and actively growing.

NOTE: Users should consult State Agricultural Experiment Stations or Extension Service Weed Specialists for recommendations as to use of this concentrate in their particular area.

IMPORTANT: Do not apply directly to, or other, when permit this concentrate or its diluted form to contact susceptible plants as this product may injure cotton, beans, peas, grapes, flowers, fruit trees, ornamentals, or other desirable plants. Avoid spray drift to such susceptible plants (coarse sprays are less likely to drift). Do not apply to areas underlaid by roots of desirable trees and shrubs. Vapors from this product may injure susceptible plants in the immediate vicinity. Thoroughly clean spray equipment with a suitable chemical cleaner before using for other purposes (or do not use same equipment for other purposes). Do not store near fertilizers, seeds, insecticides or fungicides. Do not reuse the container.

Do not apply when weather conditions favor drift from areas treated. Do not apply where runoff is likely to occur. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.
