

PRECAUTIONARY STATEMENTS

DANGER HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Keep Out of Reach of Children

Corrosive. Causes severe eye and skin damage. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not apply in marine and/or estuarine oil fields. Do not discharge into lakes, streams, ponds or public waters unless in accordance with an NPDES permit. For guidance contact your local Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARDS

Do not use or store near heat or open flame.

BACTRON K-24 MICROBIOCIDES

WATER TREATMENT MICROBIOCIDES
FOR BUILDING AND INDUSTRIAL COOLING TOWERS
AND OIL FIELD WATER FLOODS
OR SALT WATER DISPOSAL SYSTEMS

Active Ingredients

Alkyl* dimethyl benzyl ammonium chloride 50%
alkyl* (50% C₁₂, 40% C₁₄, 10% C₁₆)

Inert Ingredients

50%

50%

100%

(Continued from left side panel)

Cooling tower waters that are inherently low in algae growth and bacteria count may be adequately controlled by the lower range of these dosages. Slug feed every seven days.

Oil Field Water Flood or Salt Water Disposal Systems:

1. For the control of slime forming and sulfate reducing bacteria in oil field water flood or salt water disposal systems, add 5-10 ppm (active) BACTRON K-24 MICROBIOCIDES (1½-3 gallons per 1000 barrels of water) continuously. Levels for effective control will vary depending on conditions at the site.
2. For intermittent use, dose at a rate of ½-2 gallons BACTRON K-24 MICROBIOCIDES per 1000 barrels of water for four to eight hours per day, one to four times a week as needed to maintain control.

Add BACTRON K-24 MICROBIOCIDES directly from the drum with the proper type of metering equipment.

KEEP OUT OF REACH OF CHILDREN

DANGER

Statement of Practical Treatment

Under the Federal Insecticide, Fungicide, and Rodenticide Act, in case of CONTACT, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If SWALLOWED, drink promptly a large quantity of milk, egg whites, or gelatin solution. If these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsion may be needed.

Directions for Use

GENERAL CLASSIFICATION

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

To control algae and bacterial slimes, use BACTRON K-24 MICROBIOCIDES as directed. For best results, slug feed. The frequency of addition of microbiocides needed depends on many factors. To optimize your use of BACTRON K-24 MICROBIOCIDES, follow this procedure.

Recirculating Cooling Towers

1. Initially use 5½-8 fluid ounces per 1000 gallons of water to be treated (20-30 ppm active quaternary). Repeat the initial dose every seven days or increase the frequency, if needed.
2. When the above treatment level is successful, use 2-3 fluid ounces per 1000 gallons of water to maximize efficiency. Repeat weekly as needed.

STORAGE AND DISPOSAL

1. PROHIBITIONS—Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty container.
2. PESTICIDE DISPOSAL—Pesticide, spray mixture, or rinsate that cannot be used or chemically processed should be disposed of in a landfill approved for pesticides or buried in a safe place away from water supplies.
3. CONTAINER DISPOSAL—(a) Reseal container and offer for reconditioning, or (b) Triple rinse (or equivalent) and offer for recycling, reconditioning, or disposal in approved landfill, or bury in a safe place.
4. GENERAL—Consult Federal, State, or local disposal authorities for approved alternative procedures.
