

[8157-47]

Liqui-Cide No. 100 Insecticide kills by contact, exposed or accessible stages of the following insects:

- | | |
|---------------|-----------------|
| Roaches | Wasps |
| Silverfish | Hornets |
| Crickets | Sand Flies |
| Spiders | Clothes Moths |
| Ants | Bedbugs |
| Flour Beetles | Meal Moths |
| Weevils | Grain Mites |
| Flies | Carpet Beetles |
| Mosquitoes | Fleas |
| Skippers | Brown Dog Ticks |
| Grain Moths | in Buildings |
| Gnats | Cadellles |
| Grain Beetles | Spider Beetles |
| Meal Worms | Cheese Mites |

DIRECTIONS

For most effective results against the active stages of flying, running and crawling insects, use in a good sprayer adjusted to deliver a fine mist.

Treat infested areas thoroughly and whenever possible, keep doors and windows closed for 10 minutes after spraying. Exclude all people and pets from the area until it has been aired.

Flying Insects: For control of flies, including fruit flies, mosquitoes, gnats, sand flies, wasps, hornets and certain other flying pests, direct the spray toward the upper portions of the room and saturate the atmosphere with the mist, using 1 or 2 ounces to each 1000 cubic feet of space.

Crawling Insects: To control roaches, silverfish, crickets, and spiders, spray infested areas thoroughly and direct the liquid behind baseboards, moldings, cabinets, shelves, sinks, door and window frames, and pipes, toward drains and dark corners, and into cracks, crevices, recesses and similar hiding places.

Against ant infestations, treat shelves, cabinets and storage areas; spray ant runs, trails, baseboards, thresholds and other places of entry, and

LIQUI-CIDE NO. 100 INSECTICIDE

Liqui-Cide No. 100 Insecticide is an effective, fast-acting insecticide for the control of roaches, ants and the other listed injurious and annoying insects found in homes, institutions and buildings. It can be used around food, food products and utensils but should not be applied directly to food or foodstuffs. Liqui-Cide No. 100 Insecticide is highly useful for insect control in residences, institutions, public buildings, hospitals, hotels, clubs, restaurants, stores, markets, theaters and other situations where a potent insecticide with a high degree of effectiveness is required.

ACTIVE INGREDIENTS

Pyrethrins	100%
Piperonyl Butoxide, Technical*	0.15%
Petroleum Distillate	0.75%
	99.10%

* Equivalent to 0.60% of (butylcarbityl) (o-propylpiperonyl) ether and to 0.15% of related compounds.

CAUTION: Keep Out of Reach of Children

Harmful if swallowed. Do not spray near or toward an open flame. Avoid contamination of feed and foodstuffs.

The use of this product as a space spray in food processing plants should be confined to time periods when the plant is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using.

Do not reuse empty drum. Return to drum reconditioner or destroy by perforating or crushing and burying in a safe place.

treat nest liberally.

In controlling fleas and Brown Dog ticks in houses, direct the application toward the lower wall portions, baseboards, rugs, carpets and floors of infested area. Animal quarters, kennels and bedding should also be sprayed.

To control bedbugs effectively, apply liberally to top, ends, sides and bottom of mattresses, spraying thoroughly all tufts, seams and folds. Spray springs and frame, directing the liquid into all cracks and lock joints. Treat walls, baseboards, moldings, floors, closets and bedroom furniture, picture frames, with particular attention to protected bedbug hiding and breeding places.

For most effective control of clothes moths and carpet beetles, remove infested articles from storage, brush thoroughly and, if possible, air several hours in direct sunlight. Apply spray liberally in empty chests, closets, bureaus and storages, directing the liquid into cracks, joints and crevices. After airing, infested articles should be sprayed thoroughly including the seams and folds. Treat both sides of rugs, carpets, and pads, and all exposed and accessible surfaces of overstuffed furniture. Do not overspray if products are made of rubber or are rubber coated, to prevent expansion or swelling. Repeat treatment as needed for susceptible articles not stored in moth-tight containers.

Home and institutional pantries and food storages frequently become infested with various stored food pests including flour beetles, grain moths, weevils, cadellles, grain beetles, meal worms, spider beetles, meal moths, skippers, grain and cheese mites. To avoid sources of reinfestation, wormy flour, grain and cereal should be destroyed before treatment. Spray thoroughly all surfaces of shelves, bins, cupboards, cabinets, pantries, lockers and similar storages, with particular attention to cracks, crevices and other hiding places.
