DIRECTIONS

Metered aerosol can is designed for use in Hunter's Magic Mist Dispenser. Remove stacker cap of can and place in dispenser with spray head beneath actuator, nozzle facing front. Timed actuator will release 100 mg. of contents each 15 minutes. Build up is effected after 2 hours of operation. To maintain effectiveness and assure around-the-clock control leave unit in operation 24 hours a day.

Factors such as air currents, temperature, humidity and conformation of treated area govern number of units required for effective control. One unit should normally treat 6000 cubic feet of air space. Dispenser location should be at a height of 8 feet and directed compatibly to air currents. One can, used on a 24 hour basis will provide air sanitizing service for a 28 day service cycle.

USDA Registration Number 8169-3

Magic Mist AIR SANITIZER

REDUCES THE DANGER OF INFECTION BY
