EPA Ent 8203-CN-1

EPA Reg. No. 8203

GRANOX is a registered trade mark of Chipman Inc., Canada

**PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION**

May cause eye irritation. Harmful if swallowed. Do not get in eyes. Avoid contact with skin. Avoid inhalation of dust. Wear a pesticide respirator jointly approved by the Mining Enforcement and Safety Administration (formerly the U.S. Bureau of Mines) and by the National Institute for Occupational Safety and Health under provisions of 30 CFR Part 11. Wash with soap and water after handling. Avoid contamination of feed, food and foodstuffs.

**STATEMENT OF PRACTICAL TREATMENT**

If swallowed, induce vomiting by drinking 1 or 2 large glasses of water and then touch back of throat with fingers.

If in eyes, flush with clean water for at least 15 minutes and then get medical attention.

**ENVIRONMENTAL HAZARDS**

Toxic to fish. Do not contaminate any body of water by cleaning of equipment and disposal of wastes and containers. Exposed treated seeds may be hazardous to birds and other wildlife. Dispose of all excess treated seeds by burial away from bodies of water.

**PRODUCT INFORMATION**

GRANOX CHM, when used at the correct rate, protects seeds from soil and seed borne diseases that cause damping-off, seed decay, and seedling blights. GRANOX CHM provides essential molybdenum for plant growth where soils are found to be deficient in available molybdenum.

#### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labelling.

**Soybeans:** Apply GRANOX CHM to soybean seed at 2 oz per bushel. GRANOX CHM may be applied as a planter box application, or by the use of any dry treating equipment.

**Planter box applications:** Use GRANOX CHM at a rate of 2 oz/bushel (one scoop per bushel). Mix thoroughly with seed in the planter box as follows:

**For Conventional Plate Planters and MAX-EMERGE® Plateless Planters by John Deere -** Pour one bushel of seed into each planter box. Pour enough GRANOX CHM on top of the seed to treat one bushel. Stir thoroughly with an axe handle (purchased and used for this purpose only), wooden lath or stick, until all the seed is uniformly coated. (MAX-EMERGE® is a reg. T.M. of Deere and Co.)

**NOTE:** Avoid very deep seeding and exceptionally early sowing under poor growing conditions for maximum benefits. Use only recommended rates.

Lower amounts may not give the desired control. Regularly inspect planter plates of seed drill and clean as required. If coating of planter plate occurs (i.e. under conditions of high humidity), add small amounts of graphite to facilitate uniform seeding.

**Clean-up for Electric Eye Population Monitors:** At the end of each day of use, clean out the electric-eye monitors with brushes provided by the planter manufacturers, according to their directions.

Treated seed must not be used for or mixed with food or animal feed, or processed for oil. Treat only those seeds needed for immediate use, minimizing the interval between treatment and planting. Do not store excess treated seeds beyond planting time.

#### **STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage or disposal.

**STORAGE:** Keep container tightly closed when not in use. Store treated seed in a ventilated place away from water, food and feed.

**PESTICIDE DISPOSAL:** Pesticide spray mixture, or rinse water that cannot be used according to label instructions must be disposed of according to applicable state or local procedures.

**CONTAINER DISPOSAL:** Completely empty container and tap side and bottom to loosen clinging particles. Then dispose of in a sanitary landfill or by incineration if allowed by State and Local authorities.

#### **NOTICE TO BUYER**

Seller's guarantee shall be limited to the terms of the label and subject thereto, buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data.

2. Add the phrase "EPA Registration No. 8203-32" to your label before you release the product for shipment.

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 3(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.
