

DIRECTIONS:

AS AN AID IN CLEANING FOULED WATER
AND RETARDING EXCESS ALGAE GROWTH.
Formula to Determine Capacity of
Aquarium or Pool: Multiply length
X width X depth in inches and divide
by 231. The result will yield the
capacity of the aquarium or pool in
gallons. One teaspoonful is sufficient
to treat 4 gallons of water. 4 fl. oz.
will treat 96 gallons of water

DANGER: Causes severe burns of eye,
skin and mucous membranes. Do not get
in eyes, on skin or mucous membranes.
Not For Drug Use. Harmful if swallowed.

FIRST AID: In case of contact,
immediately flush eyes or skin with
plenty of water for at least 15
minutes. For eyes, call physician.

U.S.D.A. REG. NO. 8220-1

DIRECTIONS:

TO AID IN THE CONTROL OF ALGAE. *pool*

1 Teaspoonful to 4 gallons of aquarium
water every 2 weeks aids in controlling
Algae and to keep water clear.

ALGO lends a strong purple color to the
aquarium lasting 36 to 48 hours. The
aquarium clears as ALGO is used in its
chemical action. After the purple dis-
coloration from previous treatments has
disappeared, ALGO may be used repeatedly
in the same aquarium.

Add ALGO according to instructions only.
Do not overdose.

ALGO is a powerful oxidizer. Its use is
intended for Fish Hobbyists only.

ACTIVE INGREDIENTS:

Potassium Permanganate.....1.20%

INERT INGREDIENTS:.....98.80%
