READ ENTIRE LABEL BEFORE USING PRODUCT

GENERAL INFORMATION: FORMULA X-4 is a non-selective grass and weed killer. Foliage is killed upon contact with the spray material. Kill is faster when plants are young and actively growing. Contains a wetting agent for more effective foliage coverage. This product becomes inactive upon contact with the soil, making it safe to use around trees and shrubs where roots might be damaged with other chemicals. Repeat applications may be necessary for complete control of perennials. This product will only top-kill perennials.

DIRECTIONS FOR USING AS WEED & GRASS KILLER:

Mix FORMULA X-4 thoroughly in a sprinkling can or pressure spray tank. Use 4 to 8 gallons of FORMULA X-4 herbicide in 100 gallons of water or 5 to 10 fluid ounces per gallon of water. Apply just to the runoff stage covering foliage thoroughly. Repeat in 5 days if green areas remain. For general weed control on drainage ditchbanks and rights-of-way, along sidewalks, driveways and fences, around buildings and ornamentals, and similar non-crop areas.

LAWN RENOVATING DIRECTIONS:

Mow lawn to approximately 1 inch depth before treatment. Mix 10 fluid ounces of T & C Herbicide per gallon of water. Mix thoroughly. This should cover approximately 225 square feet (10' by 22.5') or mix 40 fluid ounces in 4 gallons of water to cover 900 square feet (30' by 30'). Apply preferably on a warm, sunny day. Bermuda grass and other deep rooted perennials may require a second treatment in 5 days. When no green areas remain, rake off all loose plant material scarifying bare spots. About five days after last treatment water thoroughly and then seed at rate recommended for new lawns. Seed must be raked into soil. Keep seeded areas well watered.

CAUTION: Do not contaminate waters used for domestic consumption, animals, fish or irrigation purposes. Keep children and pets off treated areas until after rain or sprinkling following treatment. Do not track from treated to untreated areas. Harmful if swallowed. Avoid skin contact. Avoid breathing spray mist. Wash hands after using. Avoid storing near feed or food products.

Do not graze treated areas to livestock.

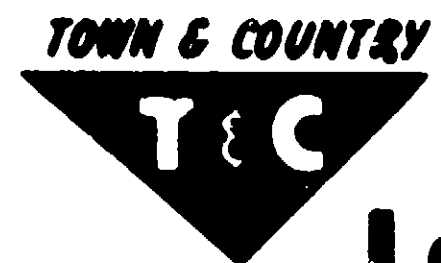

Container Disposal: Do not reuse empty container. Wash thoroughly with water and detergent solution, crush if possible and discard in a safe place.

Do not apply directly, or allow spray to come in contact with foliage, green bark, grafted unions or scuffed, damaged or broken bark when spraying around trees and ornamentals.

ANTIDOTE: If taken internally, induce vomiting and contact physician at once.

Our recommendations for use of this product are based upon tests believed to be reliable. The use of this product being beyond the control of the manufacturer, no guarantee, expressed or implied, is made as to the effects of such or the results to be obtained if not used in accordance with directions or established practice. The Buyer must assume all responsibility, including injury or damage, resulting from its misuse as such, or in combination with other materials.

non-selective grass and weed killer. Foliage is killed upon contact if plants are young and actively growing. Contains a wetting agent for more effective application. Inactive upon contact with the soil, making it safe to use around trees and other plants or chemicals. Repeat applications may be necessary for complete control of annuals and perennials.

APPLICATOR:
Use in backpack or pressure spray tank. Use 4 to 8 gallons of FORMULA X-4 herbicide per gallon of water. Apply just to the runoff stage covering foliage thoroughly. For general weed control on drainage ditchbanks and rights-of-way, around buildings and ornamentals, and similar non-crop areas.

TREATMENT: Mix 10 fluid ounces of T & C Herbicide per gallon of water. For 225 square feet (10' by 22.5') or mix 40 fluid ounces in 4 gallons of water. Apply preferably on a warm, sunny day. Bermuda grass and other deep rooted grasses. When no green areas remain, rake off all loose plant material, scarify, and water thoroughly and then seed at rate recommended for new lawns. Keep well watered.

Prevent domestic consumption, animals, fish or irrigation purposes. Keep children off treated areas following treatment. Do not track from treated to untreated areas. Avoid breathing spray mist. Wash hands after using. Avoid storing in unsealed containers.

Wash thoroughly with water and detergent solution, crush if possible.

Avoid contact with foliage, green bark, grafted unions or scuffed, damaged or worn ornamentals.

Seek medical and contact physician at once.

Based upon tests believed to be reliable. The use of this product being guaranteed, expressed or implied, is made as to the effects of such or the results in accordance with directions or established practice. The Buyer must assume all responsibility from its misuse as such, or in combination with other materials.
