DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

For Interior Use: Beams, girders, struts, supports, and other places where birds can sit or roost.

1. Machinery, floors, etc. should be covered to prevent "4 THE BIRDS" Bird Repellent Liquid from falling on them during application.
2. Surface being treated must be clean and dry to assure adhesion of repellent.
3. Clean by wiping or scraping dust, dirt, loose paint, droppings, nests, etc. from the surfaces being treated.
4. Do not dilute "4 THE BIRDS" Bird Repellent Liquid with water or other solvents. Use as is.
5. Spray to the point of "runoff". Spray in such a way that the top surfaces of beams, girders, etc. are coated. This would necessitate the applicator to be level with or above the treated surfaces during application. Apply with any hand or pressure spray gun which has a discharge pressure of more than 40 and less than 150 P.S.I.
6. Surfaces difficult to cover by spraying, should be treated by applying "4 THE BIRDS" Bird Repellent Liquid with a paint brush.
7. Cleaning: Repellent can be removed from interior surfaces, such as metal beams, wood, laminates and painted surfaces, with mineral spirits, napha or powder type cleaning agents. Repellent can be removed from concrete, tile or stone surfaces by hosing with water. However, this should be done within a very short time period after the area has been sprayed. Application equipment should be cleaned with mineral spirits after each use.

For Exterior Use: Trees, bushes, shrubs, vines, etc.

It is not recommended for use on exterior surfaces of buildings or structures since stain or residue will result.

1. Any surfaces below or near the area to be treated that you do not want coated with this sticky material should be covered to prevent "4 THE BIRDS" Bird Repellent Liquid from falling on them during application.
2. "4 THE BIRDS" Bird Repellent Liquid should be applied to the point of "runoff" to the top side of all branches large enough to support a bird.

[RIGHT PANEL]

3. Do not dilute "4 THE BIRDS" Bird Repellent Liquid with water or other solvents. Use as is.
4. Applications can only be made with hand or pressure spray guns which can generate sufficient pressure, up to 150 P.S.I., to move the material to the desired treatment site. Keep material agitated. Not for aerial application.
5. It is recommended that treatment to trees, bushes, and shrubs be made in the fall or early spring when limbs are bare and easily accessible. When used as directed, "4 THE BIRDS" Bird Repellent Liquid will neither harm trees and other vegetation nor cause phytotoxicity to foliage.
6. Spraying should be done when temperatures are 40°F or above. Drift can be minimized or eliminated by applying during calm conditions.
7. The amount of coverage you can expect is dependent on type of tree, bush or shrub you are treating, spray equipment, and number of and size of branches treated. Generally, one gallon of "4 THE BIRDS" Bird Repellent Liquid is sufficient to treat an average tree with a 5" diameter trunk, after foliage has fallen, or approximately six (6) three-foot high shrubs. These coverage approximations should be used only as a guideline.
8. Cleaning: The tackiness of the Bird Repellent can be removed from wood or stone surfaces, such as sidewalks, by hosing with water, if done very shortly after spraying. Repellent can be removed from all surfaces with mineral spirits, napha or powder type cleaning agents. Application equipment should be cleaned with mineral spirits after each use.

CAUTION: Do not apply material to trees or vines that are in bloom or bearing fruit.

NOTE: Do not spray directly on birds.
Do not apply at locations where the user has concern that desirable birds may become entangled in the product.
Avoid contamination of food or livestock feed.

PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals

Harmful if swallowed. Avoid contact with skin, eyes, or clothing. In case of contact, immediately flush eyes or skin with plenty of water. Get medical attention if irritation persists.

Environmental Hazards

Do not apply to surfaces where small protected bird species may become entrapped by this tacky repellent. Use only in conformity with Federal Migratory Bird Treaty Act Regulations.

STORAGE AND DISPOSAL

DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

IMPORTANT NOTICE: Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
