SIGNATURE OF AGENT FOR REGISTRANT			

This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.

3. Submit the 1-year storage stability data and corrosion characteristics within 15 months from the date of this Registration Notice.

4. Submit the analytical methods used to analyze for the active ingredient present in your formulation within 12 months from the date of this Registration Notice.

5. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A sample copy of the label is enclosed for your records.

## **ENVIRONMENTAL HAZARDS**

He was a man of great energy and determination, and he worked hard to establish himself in the business world. He had a strong work ethic and believed in the importance of hard work and dedication. He was a good listener and always tried to understand the needs of his clients. He was also a good communicator and was able to effectively convey his ideas and opinions. He was a good leader and was able to inspire and motivate his team. He was a good husband and father, and he always prioritized his family above all else. He was a good friend and was well-liked by those who knew him. He was a good citizen and was involved in his community. He was a good man and will be remembered fondly by all who knew him.

## **PHYSICAL OR CHEMICAL HAZARDS**

## DIRECTIONS FOR USE

1990-1991  
APRIL 1991

## **IMPORTANT NOTICE**

The application of the technique of the present invention to the analysis of the chromatograms of the organic compounds is described below.

# **CLARKE ULV MOSQUITOCIDE 73**

#### ACTIVE INGREDIENTS

Malathion	30.636%
Resmethrin	1.653%
Related Compounds	225%
*Proprietary Ingredients	4.45%
Aromatic Petroleum	54.41%
INERT INGREDIENTS	3.14%

Now the first question is, who is to be responsible for the protection of the soil? The answer is, the State. The State is to be responsible for the protection of the soil, because it is the State which has the power to make laws, and it is the State which has the power to enforce those laws. The State is to be responsible for the protection of the soil, because it is the State which has the power to make laws, and it is the State which has the power to enforce those laws.
