WHEAT & BARLEY

Hoelon

WHEAT & BARLEY

EARLY POSTEMERGENCE USE FOR WILD OAT AND OTHER ANNUAL GRASS CONTROL.

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with this labeling. This product may be applied only by certified applicators or persons directly under their supervision.

This product is registered for use in the following States: Arizona, Colorado, Idaho, Minnesota, Montana, North Dakota, Oregon, South Dakota, Utah, Washington, Wyoming and for wheat only in the following seven states: Arkansas, Georgia, Louisiana, Mississippi, North Carolina, South Carolina and Tennessee.

Dilute HOELON 3EC in water and apply as a broadcast postemergence spray at the rates listed below:

Crop	Stage of Growth (Annual Grass, Weeds)	Amount of HOELON 3EC per acre treated*	Equipment Notes
1. Fall or Spring Seeded Wheat (Including Durum)	1. 3 leaves 2. 4 leaves more than 4 leaves	2. 2.0 pints 2. 2.0 pints Do not apply	Thorough uniform spray coverage of weeds is essential. Ground application should be made at least 7 days after seeding and at least 10 days before harvest. Do not apply if rain is expected within 24 hours. Do not apply if wind is above 5 mph or within 100 ft of a lake stream pond or navigable water.
2. Spring Barley	1. 3 leaves more than 3 leaves	2. 2.0 pints Do not apply	Do not make aerial applications when wind is above 5 mph or within 100 ft of a lake stream pond or navigable water.

GENERAL INFORMATION

HOELON 3EC herbicide is an emulsifiable concentrate for selective postemergence use in the control of the following annual grasses:

WILDOATS
GREY FOXTAIL (big bluestem)
YELLOW FOXTAIL (big bluestem)
ANNUAL RYEGRASS
STALKS (barnyard grass)
BARNYARD GRASS (watergrass)

For best results, HOELON 3EC should be applied when the majority of annual grass weeds are in the one to three leaf stage of growth. Larger weeds, three to four leaves, in wheat will require a higher dosage rate. The stage of weed growth is important as is the number of weeds. In high populations, thorough uniform spray coverage of weeds is critical and use of flat fan nozzles is recommended for optimum coverage and ground coverage.

NOTE:

- HOELON 3EC does NOT control broad leaf weeds or perennial grassy weeds.
- HOELON 3EC is a selective product. Therefore, visual results will not be evident immediately following application.
- HOELON 3EC may only be tank mixed with Brominal® and Buttrill®. Other grassland herbicides should not be applied within one week of a HOELON application.
- Do not grow livestock on grass treated fields. Do not harvest hay or straw from treated fields prior to grain harvest.
- Apply HOELON 3EC according to the development of the annual grassy weeds as noted and before the one node (1st) stage of growth of the wheat and barley.
- Do not apply more than one application of HOELON 3EC in a growing season.
- Only clean water free of suspension matter or other contaminants should be used when diluting HOELON.

SPRAY HOELON 3EC WHEN THE MAJORITY OF WILD OATS AND ANNUAL GRASSES ARE IN THE GROWTH STAGES SHOWN BELOW:

ANNUAL GRASSY WEED STAGE				
Sprout	1 leaf	2 leaf	3 leaf	4 leaf
FALL OR SPRING SEEDING WHEAT INCLUDING DURUM		USE 2.0 pints	USE 2.0 pints	Do not apply
SPRING BARLEY		USE 2.0 pints	Do not apply	

STORAGE AND DISPOSAL

Store in original container in a cool, dry place. Do not use if container is damaged or leaking. Do not use if product is discolored or has a strong odor. Do not use if product is past its expiration date. Do not use if product is past its shelf life. Do not use if product is past its use-by date.
