For use in killing water, mix concentrate with water in the ratio of 1 part concentrate to 50 parts water. Approximately 1/2 gallon of this mixture will kill 100,000 mosquitos. Mix in small amounts of water in even distribution over the ground to be treated. Apply in inter-estingly, the mixture in water, (e.g., in ponds, and log ponds).

For use in killing flying insect larvae, mix concentrate with water in the ratio of 1 part concentrate to 50 parts water. Apply in inter-estingly, the mixture in water, (e.g., in ponds, and log ponds).

For use in killing larvae, mix concentrate with water in the ratio of 1 part concentrate to 50 parts water. Apply in inter-estingly, the mixture in water, (e.g., in ponds, and log ponds).
