

USE DIRECTIONS:

Use at 2 ounces per gallon. This product will provide 500 ppm quaternary to the use solution. This is enough for general disinfection, fungicidal activity against pathogenic fungi and deodorizing.

If a pseudomonicidal product is required, then use at 3 ounces per gallon.

For heavy soil, a precleaning step is recommended before using.

For best results use with a cloth or mop and apply to walls, floors and other hard surfaces. If used for sanitization of food contact items, limit the level of active quaternary to 200 ppm (4 ounces per 5 gallons).

NO RINSE REQUIRED
