[PRODUCT NAME] can be used for disinfection and sanitization

[To Clean, Disinfect and Deodorize] [Combination Disinfection and Cleaning] : For nonfood contact surfaces only.

First, use a [PeridoxRTU¹ (Brand) One-Step Germicidal Wipe] to remove heavy soil if present, or if disinfecting against *C. difficile* spores. Then, use a new, clean wipe to disinfect. [Fold wipe [in half] to form a palm-sized [XX" x XX"] pad]. Thoroughly wipe area to be disinfected at room temperature [(20-24°C)]. Work from clean sections to dirty sections, refolding wipe periodically to expose a clean wipe surface. Treated area must remain visibly wet for a minimum of 6 minutes for sporicidal activity and non-enveloped viruses, 60 seconds for tuberculocidal and fungicidal activity, and 30 seconds for bactericidal activity and enveloped viruses. [Refer to chart for effective [(kill)(contact)] time of target organisms. Wipe target area enough to remain visibly wet for the specified kill time. Let air dry. [No rinsing required.] Do not reuse [or rewet] dried out wipes.

{The following graphics illustrating use directions may be included on the label and will only be used if applicable to the packaging the label would appear on}
