

PRECAUTIONARY
STATEMENTS

HAZARDS TO HUMANS AND
DOMESTIC ANIMALS

DANGER

Highly corrosive Causes skin and eye damage. May be fatal if swallowed Do Not get in eyes on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARD

This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES permit. For guidance contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS
STRONG OXIDIZING AGENT

Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volume of water if necessary.

STORAGE
AND DISPOSAL

Keep product dry in tightly closed container when not in use. Store in cool dry well ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area, or bury in a safe place.

PRACTICAL TREATMENT

FIRST AID

If swallowed feed bread soaked in milk followed by olive or cooking oil. Call a physician immediately. If on skin brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention. If in eyes Flush with cold water for at least 15 minutes. Get medical attention.

INSTRUCTIONS

DO NOT HANDLE THIS PRODUCT WITH BARE HANDS. USE GLOVES OR THOROUGHLY CLEAN, DRY UTENSILS.

Instructions for use in spas/hot tubs are in parenthesis when different from instructions for pools. Recommended for spas operating at temperatures between 90-105°F.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STARTUP

When starting up a reopened or freshly filled swimming pool or spa make sure the filtration system is clean and operating properly. Then adjust and maintain the pH in the range of 7.2-7.8 using pH Minus or pH Plus as indicated by a reliable test kit. Adjust and maintain total alkalinity at 80-150 ppm (140-180 ppm) based on the test kit results and the label directions on pH control. Superchlorinate by adding 2 oz. of Webcor Chlorinating Concentrate per 1,000 gallons (1 oz. per 500 gals.). Repeat this step if necessary to establish a positive free chlorine residual of 1.0-1.5 ppm.

DAILY

Add Webcor Chlorinating Concentrate daily or as needed based on testing with a reliable test kit to maintain a free chlorine residual of 1.0-1.5 ppm. A suggested dosage of 1/4 to 1/2 oz. per 1,000 gallons (500 gals.) provides this residual and should be added as indicated by daily tests for the chlorine residual. The dosage required to maintain 1.0-1.5 ppm free chlorine residual may vary due to unusual conditions such as heavy bather loads, wind, heavy rains and high temperatures; therefore, frequent use of a reliable test kit is recommended. Using the test kit as a guide maintain the pH within the 7.2-7.8 range and total alkalinity at 80-150 ppm (140-180 ppm). In general, 1/4 oz. of Webcor Pool Chlorinating Concentrate per 1,000 gallons (500 gals.) of water will raise the chlorine residual by 1.0 ppm.
