"A PRODUCT FOR EVERY CLEANING PROBLEM"

FLEAS: Control fleas by thoroughly and repeatedly spraying the infested area, working the spray into cracks, crevices, floors, backgrounds, under carpets, as well as sleeping quarters of animals. Make sure that direct contact with spray is made whenever possible.

CAUTION: Do not spray in food areas and plant only when plant is not in operation. Foods should be removed from area before treatment. All food processing parts should be covered or thoroughly cleaned before use.

FLIES, MOSQUITOES AND GNATS: Control the infested area with a mist. The space should be left misty for 24 hours after treatment. It is most easily desirable to sweep up the insects after treatment. Do not breathe the mist.

CAUTION: Do not spray in food areas and plant only when plant is not in operation. Foods should be removed from area before treatment. All food processing parts should be covered or thoroughly cleaned before use.

CAUTION: KEEP OUT OF REACH OF CHILDREN. HARMFUL IF SWALLOWED. REMOVE FEES FROM CONTAINER IMMEDIATELY AFTER EACH TREATMENT.

CAUTION: Do not spray in food areas and plant only when plant is not in operation. Foods should be removed from area before treatment. All food processing parts should be covered or thoroughly cleaned before use.

Always use proper ventilation and avoid breathing spray during application. Do not spray directly on food or plants.

Do not use in areas where children or animals are present. Do not leave in sunshine. Keep out of reach of children.
