

USE DIRECTIONS

INITIAL DOSE: 1 gallon this product to 50,000 gallons of water.

MAINTENANCE DOSE: 1 quart this product to 50,000 gallons of water.

INITIAL DOSE — is used when pool is filled at beginning of swimming season. If pool water has visible algae growth, treat with INITIAL DOSE. Vacuum pool 24 hours after INITIAL DOSE to remove algae debris. If visible algae are still present or re-appear, repeat this treatment procedure as necessary. When pool is free of visible algae, use the recommended MAINTENANCE DOSE.

MAINTENANCE DOSE — should be added at 3 to 5 day intervals. If high temperatures prevail or pool has unusually heavy use, add MAINTENANCE DOSE more frequently.

If make-up water is added at the rate of more than 10% per week of the pool capacity, add 1 quart of this product for each 10,000 gallons of fresh make-up water added per week.

When swimming season is over, add 1 gallon of this product to 50,000 gallons of water, in treating water left in the pool. This DOSE helps provide a measure of control of algae growth during the winter months. This treatment will also help in the servicing of the pool before it is returned to use the following season.

FISH AND/OR WILDLIFE PRECAUTIONS: This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public waters. Apply this product only as specified on this label.

SWIM KLEEN

Concentrated Swimming Pool Algaecide

Helps keep Pool Water clear and free of Visible Algae.

Helps control Algae Slimes

ACTIVE INGREDIENTS:

n-Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chlorides 5.0%

n-Alkyl (68% C12, 32% C14) dimethyl ethylbenzyl ammonium chlorides . . . 5.0%

INERT INGREDIENTS: 90.0%
100.0%

DANGER

Keep Out of Reach of Children. See Other Precautionary Statements & First Aid on Side Panel of This Label.

Manufactured by

BERMAN CHEMICAL COMPANY
1316 Locust Street - P.O. Box 567
Toledo, Ohio 43693

This product used as directed, will kill and prevent development of *Chlorella pyenoidosa* (green), *Phormidium inundatum* (black algae), *Phormidium retzii* (Square D algae), *Lyngba versicolor* (blue-green) and other swimming pool algae.

This product is compatible with most commonly used swimming pool chemicals, but should not be mixed with soap or other cleaners, or pre-mixed with other water-treating chemicals. This product works best when added by itself directly to the pool water. This product at use dilution with water, is non-corrosive to inanimate surfaces.

DANGER: Keep Out of Reach of Children. Corrosive. Causes severe eye and skin damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call physician. Remove and wash all contaminated clothing before reuse. If swallowed, drink milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Call a physician.

RINSE EMPTY CONTAINER THOROUGHLY WITH WATER AND DISCARD.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

DON'T GUESS — calculate how many gallons of water you have in your pool, by following instructions below! Multiply the measurements in feet:

Square or rectangular pools!
Length X width X depth X 7.5,
equals gallons of water in pool.

Circular pools!
Diameter X Diameter X depth X 5.9,
equals gallons of water in pool!
