

DIRECTION FOR USE

Use 1 ounce KAPCO SANITIZOR per gallon of water (300 ppm) for general cleaning and sanitizing of hard surfaces. Use 3 ounces KAPCO SANITIZOR per gallon of water (900 ppm) for cleaning, disinfecting and deodorizing hard surfaces. Where infectious disease germs may be present, rinse all surfaces and repeat treatment as directed. If heavy soil or organic matter is present, rinse all surfaces and repeat as above.

KAPCO SANITIZOR is a concentrated product and should be diluted before using. Do not allow it to come in contact with food. It should not be mixed with soap or other anionic detergents which are incompatible. Avoid getting the concentrate in the eyes. In case of contact with the eyes, flush thoroughly with water and get medical attention.

Rinse empty container thoroughly with water and discard it.

HOW KAPCO SANITIZOR WORKS

Kapco Sanitizer is a concentrated balanced formulation containing a positive deodorizer, non-ionic detergent and builders. This combination makes Kapco Sanitizer a most efficient product for cleaning, disinfecting and deodorizing in one labor-saving operation.

WHERE TO USE: KAPCO SANITIZOR
Kapco Sanitizer can be used in homes, motels, schools and other private and public buildings. It should be used at regular intervals to thoroughly clean, deodorize, sanitize and disinfect floors, lavatories, urinals, walls, telephones, furniture, garbage pails, refrigerators, diaper pails, shower stalls, venetian blinds and other similar articles, and areas that require general cleaning. In use with refrigerators and other surfaces that come in contact with food, be sure to rinse thoroughly with potable water after treatment.

WARNING:

Harmful if swallowed. Cause skin and eye irritation: Do not get in eyes or on skin. In case of skin contact, wash thoroughly with water. If irritation persists, get medical attention. Avoid contamination of food and feeds. In case of contact with eyes, be sure to flush thoroughly with water and get medical attention.
