Moss is a simple form of plant life with green leaves and roots in damp areas. It is harmful to any roof where it appears. Moss grows vigorously during the rainy season, fall, winter and spring. Very little growth occurs during the summer. Control by chemical spraying is most effective when rain is not likely for several days.

### WARNING

Use care when applying MOSS-STOP to harm plants which it may contact. Prevent contact with trees, plants or grass. This product is toxic to fish and birds. Keep out of lakes, streams or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.
