

DIRECTIONS

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Use care when applying. MOSS STOP will harm plants which it may contact. Prevent contact with trees, plants, or grass.

For outdoor use only. Keep children and pets off treated areas until dry. Wear gloves (not canvas). Contaminated clothes will irritate skin unless clothes are washed thoroughly.

PREPARING USE-SOLUTION

1. Add 1 GALLON MOSS-STOP to 11 GALLONS WATER
2. Mix thoroughly.
3. Apply as indicated below.
4. Use-solution should be remixed prior to application, if allowed to stand for several hours.

AMOUNT TO APPLY

HEAVY MOSS DEPOSITS: Apply 1 1/2 gal use-solution to each 250 sq. ft. of roof.

LIGHT MOSS DEPOSITS: Apply 1 1/2 gal use-solution to each 400 sq. ft. of roof.

To kill moss it is necessary to wet the roof with MOSS STOP solution. Exercise judgment in applying enough to wet roof—generally just short of causing runoff. Do not apply when moss is wet with rain as wet moss will not absorb product. Avoid stepping on treated area while wet, so shoes will not carry solution into house.

HOUSES WITH NO GUTTERS: Exercise special care. Do not allow use-solution to run directly off roof edges onto plants. Cover plants with plastic sheets to assure safety. Apply only when not raining to prevent runoff.

IF COLOR IS DESIRED: Add a water-base stain to product.

WHITE SURFACES: May stain white surfaces. Test small area prior to applying.

WALKS AND WALLS

Prepare use-solution as above. Apply solution to concrete, brick or wooden walks and walls with paint brush or paint roller, only when not raining. Apply just enough use-solution to wet the moss.

Directions continued on right side.

RESTRICTED USE PESTICIDE

FOR RETAIL SALE AND APPLICATION ONLY BY CERTIFIED APPLICATORS OR PERSONS UNDER THEIR DIRECT SUPERVISION.

MOSS STOP

- Kills Moss
- Stops Dry Rot

Controls deterioration from fungus organisms, for several years

Apply any time of the year
Recommended for application on any type of roof. Also for unwanted moss on concrete, brick or wood.
Do not apply on grass, shrubs or trees.

Directions continued

Storage: Do not store or dispose in drums, other pest containers, absorb liquid with and incinerate or

Disposal: Pesticide of excess pesticide of Federal Law of by use according state Pesticide or Hazardous Waste regional Office for equivalent). The or puncture and other procedures

ACTIVE INGREDIENTS:

Sodium pentachlorophenate 25.1%

Other chlorophenates 3.1%

INERT INGREDIENTS

Total active ingredients equivalent to 28.2% Pentachlorophenol and 2.7% other chlorophenols.

EPA REG. NO. 8501-31 SEP 11 1984

EPA EST. NO. 8501-WA-1

KEEP OUT OF REACH OF CHILDREN

WARNING

Causes skin and eye irritation. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or clothing. Do not breathe spray mist. Wash thoroughly after handling. If clothing is contaminated, wash before reuse.

See side panel for statement of practical treatment and additional precautionary statements.

STORAGE & DISPOSAL

Storage: Do not contaminate water, food, or feed by
storage or disposal. Do not store near food, feed, fertil-
izers, other pesticides or seeds. In case of spill or leak,
absorb liquid with sawdust or other absorbent material
and incinerate or dispose of in an approved disposal area.

Disposal: Pesticide wastes are toxic. Improper disposal
of excess pesticide, spray mixture, or rinsate is a viola-
tion of Federal Law. If these wastes cannot be disposed
of by use according to label instructions, contact your
state Pesticide or Environmental Control Agency, or the
Hazardous Waste representative at the nearest EPA Re-
gional Office for guidance. Container; Triple rinse (or
equivalent). Then offer for recycling or reconditioning,
or puncture and dispose of in a sanitary landfill, or by
other procedures approved by State and Local authorities.

PRECAUTIONARY STATEMENTS

HAZARD TO HUMANS & DOMESTIC ANIMALS

WARNING: Causes skin and eye irritation. Harmful if
swallowed or absorbed through skin. Do not get in eyes,
on skin or clothing. Do not breathe spray mist. Wash
thoroughly after handling. If clothing is contaminated,
wash before reuse.

STATEMENT OF PRACTICAL TREATMENT

If on skin: Wash with plenty of soap and water.
If in eyes: Flush with plenty of water. Get medical atten-
tion.
If swallowed: Give plenty of milk and call physician im-
mediately.

ENVIRONMENTAL HAZARD: This product is toxic to fish
and wildlife. Do not apply directly to water. Do not apply
when weather conditions favor drift from target area.

Form 884

The U.S. EPA has determined that pentachlorophenol can produce defects in the offspring of laboratory animals. Exposure to pentachlorophenol during pregnancy should be avoided.

Applicators must wear gloves impervious to the wood treatment formulation in all situations where dermal contact is expected (for example, during the actual application process and when handling freshly treated wood).

Spray applicators must wear protective clothing (including overalls, jackets, gloves and boots) impervious to the wood treatment formulation, and a respirator, head covering, and goggles when spraying.

Applicators who apply pentachlorophenol by other application methods (e.g., brush-on) must wear disposable coveralls or other suitable impermeable protective clothing. Launder non disposable protective clothing separately from other clothing.

Applicators must not eat, drink, or use tobacco products during those parts of the application process that may expose them to the wood treatment formulation.

Wash thoroughly after skin contact, and before eating, drinking, use of tobacco products, or using restrooms.

Protective clothing must be changed when it shows signs of contamination. Dispose of worn-out protective clothing and workshoes or boots in any general landfill, in the trash, or in any other manner approved for pesticide disposal.

Avoid inhaling vapors. If inhalation of vapors cannot be avoided, applicators must wear a properly fitting, well-maintained half-mask canister or cartridge respirator which is MSHA/NIOSH approved for organic vapors and acid gases.

Do not apply where there may be direct contact with domestic animals or livestock, and where there may be contamination of food, feed, or drinking and irrigation water.

Do not apply to interiors. Do not apply to wood intended for use in interiors except for those support structures which are in contact with the soil in barns, stables, and similar sites and which are subject to decay or insect infestation, and millwork which has outdoor surfaces (e.g., doorframes, windows and patio frames). Interior surfaces of the treated wood should be sealed with two coats of an appropriate sealer.

Do not apply pentachlorophenol to wood intended for farrowing or brooding facilities. Do not apply pentachlorophenol to wood intended to be used in the interiors of farm buildings where there may be direct contact with domestic animals or livestock which may crib (bite) or lick the wood. Pentachlorophenol may be used to treat wood intended to be used in interiors of farm buildings where domestic animals or livestock are unlikely to crib or lick the wood, if two coats of an appropriate sealer will be applied.

Do not apply to wood intended to be used in a manner in which the preservative may become a component of food or animal feed. Examples of such sites would be structures or containers for storing silage or food.

Do not use this product to treat wood intended to be used for cutting boards or counter tops.

Do not use this product to treat wood intended for construction of those portions of beehives which may come into contact with the honey.

Do not use this product to treat wood intended to be used where it may come into direct or indirect contact with public drinking water, except for those uses involving incidental contact such as docks and bridges.

Do not use this product to treat wood intended to be used where it may come into direct or indirect contact with drinking water for domestic animals or livestock, except for uses involving incidental contact such as docks and bridges.

Wood to be treated with this product should be cut to size before treatment. If it is necessary to saw or machine wood after treatment, wear goggles to protect the eyes from flying particles and a dust mask to avoid inhaling sawdust from the treated wood. If oily preservatives or sawdust accumulate on clothes, launder before reuse. Wash work clothes separately from other household laundry.

Contact with treated surfaces should be avoided even after the preservative has dried. When handling treated wood wear tightly woven coveralls and gloves which are impervious (e.g., vinyl coated) to the pesticide. Wash exposed skin thoroughly after contact with treated wood, and before eating, drinking or using tobacco products.

Wood which has been treated with this product should be disposed by burial or ordinary trash collection. Do not burn treated wood in outdoor fire or in stoves or fireplace because toxic chemicals may be produced as part of the smoke and ashes.

This product should not be used to treat wood which will be in frequent or prolonged contact with skin, unless the wood will be treated with an effective sealer.

NOTE TO USER: As used on this label, the term "respirators" means properly fitting, well maintained half-mask canister or cartridge respirators which are MSHA/NIOSH approved for organic vapors and acid gases. Examples of acceptable materials for protective clothing (e.g., overalls, jackets, head covering, boots, disposable coveralls, and gloves) required during application and handling of pentachlorophenol are polyvinyl acetate (PVA), polyvinyl chloride (PVC), neoprene, NBR (Buna-N), and nitrile. Urethane, shellac, and epoxy enamel and varnish are acceptable sealers for pentachlorophenol treated wood.
