GENERAL INFORMATION

For total weed control on certain areas around the home, the business, or workplace where no plant growth is desired, use as specified in label directions.

Prevents plant growth for up to one year

This liquid Veg Kill 15 is a nonselective product intended for use without further dilution. For best results, apply to bare ground or when weed growth is just starting. Weeds taller than 4-6 inches should be hoed before treatment or it may be necessary to make a second application. A second application may be necessary to control deep rooted perennial weeds. Use for bare ground, vegetable gardens, driveways, brick walks, paths, patios, parking areas, lawns, lawns, lawns, and curbs around buildings and under graded pathways where plant growth is not desired through these surfaces.

DIRECTION FOR USE

This is a liquid of federal law. Use this product in a manner approved by the EPA.

For control of annual and susceptible perennial weeds such as growing crabgrass, pigweed, goosegrass, quackgrass, puncturevine, ground and spurge. To cover 100 sq ft, apply 1/2 to 1 qt. and use product by use of a sprayer or other watering or spraying device. For control of hard-to-kill, perennial broadleaf and grass weeds such as bindweed and johnsongrass as well as the biennial common mullein and white clover, use 1 1/2 to 2 qts. per 100 sq ft.

When using a sprayer, pump, hose and nozzle, use on area treated in a application is complete. Mix only the quantity needed and use immediately. To minimize lateral movement, spray lightly with a watering can or similar sprayer device immediately after application.

CAUTIONS: 1. Apply when air is calm to avoid the possibility of drift onto desirable plants or grass. 2. Keep away from the roots of desirable plants and trees. 3. Use only in areas where complete control of vegetation is desired. 4. **VEG KILL 15 LIQUID VEGETATION KILLER SHOULD NOT BE USED ON CULTIVATED AREAS, ON GROUND THAT IS TO BE CULTIVATED, IN GREENHOUSES, OR NEAR THE DRIPLINE OF TREES OR SHRUBS.** 5. Do not use on slopes or in areas where runoff is likely to occur; apply only to level surfaces. 6. Avoid using where adjacent desirable trees, shrubs or plants may be injured from leaching of the chemical through the soil. 7. Keep children and animals off treated areas until these areas are dry.
