downward towards the floor. Apply fog to such an extent that columns and machinery are just barely visible at a distance of four feet when viewed in light of ordinary intensity, 30 to 35 ft. condies. Back out of fog slowly, keeping just ahead of fog bank. Move backwards frequently to see that exit route is clear and free of fog (NOTE SAFETY PRECAUTION AT THE END OF DIRECTIONS.) Doors and windows may be opened and ventilation restored after 15 minutes or as soon as fog has dissipated, which requires a test. Sweep up and burn all fallen insects immediately upon re-entry of area.

ANTS: Apply as directed directly on ants. Treat ant trails and areas around doorways and window frames where ants may enter premises.

SAFETY PRECAUTION: Each worker should be provided with a suitable safety mask (Acme No. CM570 Respirator Mask or equivalent) and this mask should be worn whenever insecticide is being applied in the presence of any parts of fogging equipment.

When fogging large rooms and obstructed areas, two persons should be available to operate the fogger and the fogger should be locked out and safety man. Good safety practice requires that the operator of the fogging equipment should wear a lifeline around his waist to enable the rescuer or reader assistant should this be necessary.

Empty containers with water and destroy by incineration. Pick up spills and spray wastes with sand or other absorbent material and incinerate it. Clean contaminated surfaces and area with detergent solution of 140 F. water and rinse thoroughly.
