INSTRUCTIONS

LBS

DIRECTIONS FOR USE

PIC-CLOR 60 is a preplant soil fumigant for control of soil-borne pests such as wireworms and nematodes.

CATEGORY OF APPLICATOR

FOR RETAIL SALE AND USE ONLY BY CERTIFIED APPLICATORS OR PERSONS UNDER THEIR DIRECT SUPERVISION AND ONLY FOR THOSE USES COVERED BY THE CERTIFIED APPLICATORS CERTIFICATION.

STORAGE, SHIPMENT AND DISPOSAL

STORAGE - Store in tightly closed original container away from dwellings, livestock, and food. Do not use for anything other than the purpose intended. Do not use for anything other than the purpose intended.

SHIPMENT - Ship in original container in accordance with label.

DISPOSAL - Follow equipment and container disposal instructions. Do not dump or dispose of in any way other than approved for pesticide disposal. Do not dump or dispose of in any way other than approved for pesticide disposal.

RETURN OF CYLINDERS

1. Cylinders are the property of Syngenta Chemicals Corp.
2. 6 East 220th Street
Long Beach, California 90801
3. Syngenta Chemicals Corp.
7610 Highway 41 North
Palmdale, Florida 33561

4. Cylinders should be returned promptly by first class freight.
5. When cylinder is empty, the valve should be closed, the safety cap screwed onto the valve, and the protection cap replaced prior to its return to the shipper.
6. Do not ship cylinders without safety caps or valve protection bonnets.
7. When cylinder is partially full, and there is no further requirement for the product, contact Syngenta Chemicals Corporation for return instructions.
8. Cylinders should never be refilled by the consumer or used for any other product or purpose.

GENERAL INFORMATION

PIC-CLOR 60 is a preplant soil fumigant for control of soil-borne pests such as wireworms and nematodes, and diseases caused by certain species of Rhizoctonia, Pythium, Fusarium, Phytophthora, and Verticillium. PIC-CLOR 60 is to be used in soil to be planted to crops listed below. Prior to application the soil should be in condition for planting and with sufficient moisture to support seed germination.

APPLICATION

Apply PIC-CLOR 60 by means of chisels spaced no more than 12" apart and at a depth of 8" below the surface. To seal in fumigant after application drag or cultipack immediately behind chisels or wet down treated area to a depth of 1" or cover area with a plastic tarpaulin. If a plastic tarpaulin is used it may be removed after 24 hours. Do not apply PIC-CLOR 60 to areas adjacent to fields where valuable crops are growing or near buildings inhabited by humans or livestock.

RECOMMENDED DOSAGES

Land To Be Planted To	Lbs. Per Acre
Strawberries	500-650*
Tomatoes	500-650*
Flora Crops	500-650*
Nursery Crops	500-650*
Onions	500-550
Radishes	500-550
Plant & Seed Beds	500-550
Eggplant	500-650*
Cucumbers	500-550
Melons	500-650*
Sweet Potatoes	275-375

* If treated areas are covered with a plastic tarpaulin immediately after application, dosage may be reduced by 33%.

EXPOSURE AND AERATION

After application, leave the soil undisturbed for 4 to 20 days. Wet soil retards diffusion of the fumigant, thus requiring a longer exposure period. At the end of the exposure period, aerate the soil by plowing or deep tilling. If heavy rains accompanied by low temperatures occur during the exposure period, working soil several times is essential for the fumigant to penetrate the soil completely. When the odor of the fumigant is no longer detectable.

WARRANTY

NOTICE - Buyer warrants that the product conforms to its chemical description and is suitable for the purpose stated in the label when used in accordance with directions. Buyer assumes all liability for any loss or damage, but neither this warranty nor any other warranty of the manufacturer shall be construed as a warranty for a PARTICULAR PURPOSE, express or implied, extends to any use of the product contrary to label instructions or under abnormal conditions or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.

EXPOSURE AND AERATION

After application leave the soil undisturbed for 14 to 21 days. Wet the fumigant, thus requiring a longer exposure period. At the end of the exposure period, aerate the soil by plowing or deep cultivation. If heavy rains or temperatures below 50°F during the exposure period, working soil several times during the exposure period. Aeration is nearly complete when the odor of the fumigant is no longer detectable.

WARRANTY

NOTICE: Seller warrants that the product conforms to its chemical composition for the purpose stated on the label when used in accordance with the label instructions, but neither this warranty nor a representation of fitness for a particular purpose, expressed or implied, shall be construed as a warranty of fitness for a particular purpose, or under any other theory of liability, except as may be reasonably foreseeable to seller and buyer assuming the use of the product.

A. N. P. :

Do Not Breathe Vapor. Do Not Get In Eyes, on Skin, on Clothing. Do Not Take Internally. Use Only With Adequate Ventilation. Wear Eye and Skin Protection Necessary to Prevent Contact When Handling. Wash Thoroughly After Handling and Before Eating or Smoking.

[illegible][illegible][illegible]

DO NOT GET ON SKIN Avoid contact with skin. Wear protective body coverings. Do not get on contaminated surfaces. Do not use contaminated coverings. Avoid contact with contaminated surfaces. Do not get on contaminated surfaces.

There are a number of things that you should be aware of when you are buying a rubber shoe. First, you should look for the word "rubber" on the sole of the shoe. This is a good indication that the shoe is made of rubber. Second, you should look for the word "waterproof" on the sole of the shoe. This is a good indication that the shoe is made of a material that will not absorb water. Third, you should look for the word "breathable" on the sole of the shoe. This is a good indication that the shoe is made of a material that will allow air to circulate around your feet. Fourth, you should look for the word "flexible" on the sole of the shoe. This is a good indication that the shoe is made of a material that will bend with your foot. Finally, you should look for the word "comfortable" on the sole of the shoe. This is a good indication that the shoe is made of a material that will feel good on your feet.

DO NOT GET IN EYES — Avoid getting the solution in your eyes. If it does get in your eyes, flush eyes with water for 15 minutes. If irritation persists, consult your physician.

DO NOT SWALLOW **DO NOT SWALLOW** **DO NOT SWALLOW** **DO NOT SWALLOW** **DO NOT SWALLOW**

[illegible][illegible]

As the population of the United States grows, the need for a more efficient and effective way to manage the nation's resources becomes increasingly apparent. The current system of resource management is outdated and inefficient, and it is time to develop a new system that can meet the needs of the future.
