Dear Mr. Johnson:

This is to notify you of minor changes to labeling for the above-referenced product. Enclosed, please find EPA Form 8570-1 and a copy of the label with the corrections highlighted. Although correcting the typographical error results in a change in the ingredients statement ("other ingredients"), in a letter from Sherada D. Hobgood, dated May 11, 1998, the Agency stated that this correction could be made by notification, see copy enclosed.

This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

Sincerely,

PROTECTING THE FOODS THAT FEED THE NATION

SPACE SPRAY, Continued: Close windows and doors and shut off ventilating systems. Use a fogger or vaporizer adjusted to deliver an aerosol spray (no droplets over 50 microns in diameter and 80% less than 30 microns).

Apply at a rate of one ounce per 1000 cubic feet of space. Direct the spray toward the ceiling and upper corners of the area and behind obstructions. For best control of wasps and hornets, apply directly to nests in the evening when the insects have returned to the nests.

Vacate the treated area and ventilate before reoccupying. After spraying, all equipment, benches, shelving, etc. where food will be handled must be washed with an effective cleaning compound and rinsed with potable water.

Repeat treatment as necessary.

SPACE AND CONTACT SPRAY: For control of accessible exposed states of ants, cheese mites, clover mites, crickets, cockroaches, earwigs, scorpions, silverfish, spiders.

Cover or remove any food and food processing equipment before application. First, using equipment which can deliver a pin spray, direct spray into all cracks and crevices in woodwork, walls, floors, underneath sinks, behind pipes and in all places where these insects are known to seek shelter. Contact as many insects as possible, spray directly all ant trails. Then, closing all doors, windows and ventilating systems, proceed with space spraying directions as given above.

Use a dosage rate of one ounce per 1,000 cubic feet of space. Keep the area closed for at least 15 minutes. Vacate the treated area and ventilate before reoccupying. After treatment, all equipment, benches, shelving, etc. where food will be handled must be washed with an effective cleaning compound and rinsed with potable water.

Repeat treatment as necessary.
