UNDER THE FEDERAL INSECTICIDE
FUNGICIDE AND RODENTICIDE ACT
FOR FUNGICIDE AND RODENTICIDE REGISTERED
ED NO. 8540-1

FORMULA NO. 30

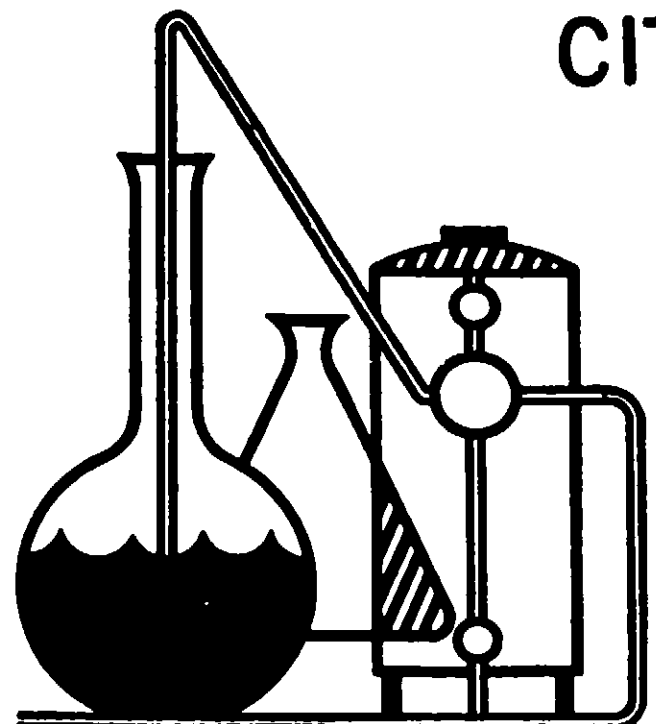

TO AID IN THE CONTROL OF ALGAL SLIMES AND FUNGI IN INDUSTRIAL
RECIRCULATING COOLING WATER SYSTEMS

U.S.D.A. REGISTRATION NO. 8540-1

GARRATT-CALLAHAN CO.
WATER TREATMENT ENGINEERS SINCE 1904

OFFICES IN PRINCIPAL
CITIES AND STRATEGIC
INDUSTRIAL AREAS

HOME OFFICE
111 ROLLINS RD.
MILLBRAE
CALIFORNIA 94030

ACTIVE INGREDIENTS

Sodium Pentachlorophenate..... 90%

INERT INGREDIENTS..... 10%

INSTRUCTIONS

Biocides are most effective against microorganisms if the system to be treated is first cleaned of as much deposit and debris as possible. Formula 30 may be added directly to the water being treated. Addition may be made in the basin or sump of a cooling tower or over the surface of a cooling pond. A slug dose of 5 to 10 pellets of Formula 30 per 1,000 gallons of water is an average treatment. This is the equivalent of 37.5 to 75 ppm of Formula 30. This dose may be repeated every seven days or less until biological growth is controlled. Consult your Garratt-Callahan Engineer.

HANDLING

Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Do not breathe dust or spray mist. Causes skin irritation. Keep out of contact with foodstuffs or potable water. Get medical attention if swallowed or if dust gets in eyes. Do not use in swimming pools. Wash after handling.

FOR INDUSTRIAL USE ONLY

CAUTION

KEEP OUT OF THE REACH OF CHILDREN
