

SANI-CLOR

al-j-trol

ACTIVE INGREDIENT

Poly[oxyethylene (dimethylamino ethylene
dimethylamino ethylene dichloride)]

60.0%

INERT INGREDIENT

40.0%

This product contains 5.76 lb. of active ingredient per gallon and weighs 9.6 lb. per gallon.

Keep Out Of Reach Of Children

CAUTION

EPA EST. NO. 8544-CA-01

EPA REG. NO. 8544-18

NET CONTENTS ONE GALLON (3.785 LITERS).

**DIRECTIONS FOR USE
GENERAL CLASSIFICATION**

This is a violation of Federal law to use this product in a manner inconsistent with its labeling.

ALJ-TROL is used to control the growth of algae in swimming pools. For maximum effectiveness, it should be applied heavily to walls of pools and to the floor prior to using ALJ-TROL.

For pools having just visible algae growth, add an initial dose of 1 1/2 fluid ounces of ALJ-TROL per 10,000 gallons of water and reapply after 3-4 days of cleaning.

For treatment of a freshly cleaned initial algae growth, initially apply 1 1/2 fluid ounces of ALJ-TROL per 10,000 gallons of water.

To maintain pools free of visible algae growth, subsequent additions of 1/4 fluid ounce of ALJ-TROL per 10,000 gallons of water should be made every 5-7 days after the initial treatment.

ALJ-TROL is compatible with those chemicals normally used to treat pools and effective at both acid and alkaline pH. ALJ-TROL can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix ALJ-TROL with concentrated dry or liquid chlorine products.
