

NOTICE OF PESTICIDE: ☐ REGISTRATION
☒ REREISTRATION
(Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended)

NAME OF PESTICIDE PRODUCT

Spa-Kleen Granules II

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

GPS Industries
13280 Amar Road
City of Industry, CA 91746

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Based on your response to the Reregistration Eligibility Document, EPA has reregistered the above named product subject to the comments recorded in the succeeding paragraph. This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product.

Make the following labeling changes before you release the product for shipment:

1. Refer to the enclosed Attachment A for the necessary revisions to the Precautionary Statements for the subject product.

2. Revise the Environmental Hazards to read as follows:

"This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant

☐ ATTACHMENT IS APPLICABLE

SIGNATURE OF APPROVING OFFICIAL

DATE

authority. For guidance, contact your State Water Board or Regional Office of the EPA".

3. Under the directions for swimming pool/spa use include the statement "Re-entry into treated pools/spas is prohibited above levels of 3 ppm of chlorine.
4. Under Storage & Disposal include "Do not contaminate water food or feed by storage or disposal".
5. Under Storage & Disposal delete "or bury in a safe place".
6. Revise the disposal instruction in accordance with the Pest/DIS-1 enclosure.

A stamped copy of the product label is enclosed for your records.

Submit one copy of the final printed labeling before releasing the product in channels of trade with the revised labeling.

Submit a revised Confidential Statement of Formula. The nominal concentration of 99% should fall between the upper and lower certified limit. You may wish to lower the lower limit to 98% and delete all the nominal values between parenthesis in columns 14(a) and 14(b).

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

Antimicrobial Program Branch
Registration Division (7505C)

Enclosure

Attachment A - Batch 26 Products

Labeling:

1. The signal word is "Danger".

2. The Precautionary Statements should read:

"Corrosive: Cause irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or on clothing. Do not breathe dust, vapor or spray mist. Wear goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse".

3. The Statements of Practical Treatment should read:

"If in eyes: Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention".

"If inhaled: Remove victim to fresh air. If not breathing, give artificial respiration preferably mouth-to-mouth. Get medical attention".

"If on Skin: Wash with plenty of soap and water. Get medical attention if irritation persists".

"If swallowed: Drink promptly large quantities of water. Avoid alcohol. Note to physician: Probable mucosal damage may contraindicate the use of gastric lavage. Get medical attention".

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS & DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS

STRONG OXIDIZING AGENT: Strong Oxidizing Agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and composition. Do not reseal container. If possible, isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area, or bury in a safe place.

Under the authority of the
EPA, the following information is
being provided to you for your
information only. This is not a
recommendation under EPA Reg. No.
8344-20

DIRECTIONS FOR USE IN SPAS AND HOT TUBS

High temperatures in spas and hot tubs has a substantial effect on the rate of loss of available free chlorine in the water. The use directions for this product will differ for two sets of temperature variations. Of course, there is always a demand for minimum available free chlorine to prevent algae and bacteria from forming no matter what the temperature may be.

1. High temperature (90°F to 104°F)
 - a. Check free available chlorine with a Sani-Test test kit before entering the spa or hot tub. If below 1.0 ppm add 1 oz. (one cap full) of granules 2 for each 500 gallons of water. Add granules 2 by broadcasting over spa or hot tub surface. When a reading of 1.5 to 3.00 has been established as determined with a test kit, the spa or hot tub will be ready for use.
 - b. To maintain free available chlorine at high temperature, add 1 oz. of granules 2 each 30 minutes or as required to maintain 1.0 to 3.0 ppm of free available chlorine. Additions of granules 2 will depend on bather load and water temperature. Test spa and hot tub water frequently with a suitable test kit to assure a free available chlorine residual at all times.
2. Low temperature (90°F and below)
 - a. Check free available chlorine with a suitable test kit. If below 1.0 ppm add 1 oz. of granules 2 for each 500 gallons. Repeat additions until free available of 1.0 to 1.5 has been established as determined with a suitable test kit.
 - b. To maintain free available chlorine add 1 oz. of granules 2 for each 500 gallons daily or as needed to maintain 1.0 to 1.5 ppm free available chlorine. Always add product to spa or hot tub by broadcasting over the water.

IMPORTANT SUGGESTIONS

1. Once each week test the pH of the water with a suitable test kit. Maintain a pH of 7.2-7.6. If pH is above 7.6 add Sani-Chlor dry acid. If the pH is below 7.2 add Sani-Chlor soda ash. Follow label instructions on these products.
2. Organic contamination* of spa and hot tubs is a constant threat to proper sanitation. In order to destroy these contaminations you must Super Chlorinate the water in the spa and hot tub. This should be done weekly. It is good practice to double or triple the dose that you normally use to sanitize your spa or hot tub. This is known as Super Chlorination. Do not enter the spa or hot tub until the free available chlorine is below 3.0 ppm. Test with a suitable test kit.

*Perspiration, suntan lotion, hair spray, and scaling from skin of bathers
