Reno, Nevada

SIDE PANEL

GENERAL INFORMATION

DeL-Kill Weed Killer 401 Liquid is a specially formulated non-selective chemical for controlling a wide range of annual and perennial weeds and grasses. It is recommended for use only on non-cropland areas such as railroad rights-of-way and industrial sites. The degree of control and duration of results will vary with the amount of DeL-Kill applied, soil type, rainfall and other conditions. Highly recommended for municipal weed control and for barren soil.

DIRECTIONS

To control most weeds and grasses on non-cropland areas such as railroad rights-of-way and industrial sites for an extended time, apply 43.5 gallons per acre of undiluted DeL Kill 401 after the most predominant weeds have been emerged. No agitation is required. DeL Kill 401 should be applied with railroad on-track, truck mounted, or other standard spraying equipment. For treating small areas, a tank-type hand sprayer or sprinkling can may be used.

Users should consult experiment station or extension service weed specialists for recommendations as to use of DeL-Kill 401 in their particular area or contact DeL service representatives.

CAUTION

Do not apply DeL-Kill 401 directly to, or otherwise permit it to come into contact with susceptible plants such as vegetables, flowers, fruit trees, ornamentals, cotton, grapes or other desirable plants and do not permit spray mists containing it to drift onto them. (Coarse sprays are less likely to drift). Vapors from this product may injure susceptible plants in the immediate vicinity. Thoroughly clean spray equipment with a suitable chemical cleaner before using for other purposes (or do not use same spray equipment for other purposes). Do not store near fertilizers, seeds, insecticides or fungicides. Do not contaminate waters used for irrigation or domestic purposes. Do not re-use this container for other materials without thorough cleaning.
