

# AMMATE\* X

## weed & brush killer

### NON-SELECTIVE

#### GENERAL INFORMATION

Use "Ammate" X, Non-Selective Weed and Brush Killer, on rights of way, roadsides, drainage ditches, fence rows. For use under apple trees and pear trees and for treating tree stumps.

"Ammate" X is highly effective for killing undesirable woody plants and for use as a contact spray for control of weeds and grasses. Temporary non-productivity of soil may be caused by heavy applications of "Ammate" X; this condition usually disappears in the "over-winter" period.

Some species of woody plants and perennial weeds are difficult to control, and retreatment may be necessary if regrowth occurs.

"Ammate" X is water-soluble, non-volatile, and non-flammable. It may be applied from a sprayer or sprinkling can. Direct sprays away from lawns and desirable plants to avoid injury. Coarse sprays are less likely to drift. It is non-selective; do not apply to, or drain, or flush equipment on desirable plants or vegetation.

**WARRANTY:** Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use. Any damages arising from a breach of this warranty shall be limited to direct damages, and shall not include consequential commercial damages such as loss of profits or values, etc.

**CAUTION:** Avoid prolonged contact of skin with strong solution of this material. In case of contact, wash off with plenty of water. Do not use in vegetable gardens.

Do not reuse empty container. Destroy it by burying with waste or burning. Stay away from smoke or fumes.

**NOTE:** This product is to be sold ONLY in this original unbroken package.

Packaged and distributed by  
AGWAY INC.

EPA Reg. No. 8590-219

#### ACTIVE INGREDIENTS:

Ammonium Sulfamate

#### INERT INGREDIENTS:

100.00%

\*Registered trademark and product of E. I. Du Pont de Nemours & Co. Inc.

**CAUTION:** KEEP OUT OF REACH OF CHILDREN.

USE STRICTLY IN ACCORDANCE WITH LABEL CAUTIONS, WARNINGS AND DIRECTIONS.

The addition of a wetting agent, surfactant, or household detergent will improve the wetting action on hard to wet foliage. Use approximately one teaspoonful to each gallon of dilute spray.

**WOODY PLANTS:** For control of Poison Ivy, Poison Oak, Poison Sumac, Tree Sprouts, Bramble and other Brush—Apply as a drenching spray anytime after the foliage reaches full leaf stage and until foliage begins to discolor due to frost. Wet foliage thoroughly. For best results, spray during periods of high humidity. Respray if any recovery is noted.

Rate: Mix 1 lb. per gallon of water.

**TO KILL VEGETATION ON DRIVEWAYS, WALKS, TENNIS COURTS AND SIMILAR LOCATIONS:** Apply uniformly with a sprinkling can or sprayer. The degree of control and duration of effect will vary with weed species, rainfall, temperature and other conditions.

Rate: Mix 1 lb. per gallon of water for 25 sq. ft.

**TO KILL UNDESIRABLE PLANTS UNDER APPLE AND PEAR TREES:** For control of Poison Ivy, Weeds and Brush—Apply as a coarse wetting spray when foliage reaches full leaf stage. Usually one gallon of the spray solution will cover 250 sq. ft., or use approximately 2 gallons of spray for a tree with a spread of 25 feet. For Poison Ivy growing on tree trunks, apply spray only if the bark of the tree is well developed and shows no green. Avoid excessive wetting of the bark as injury may result. Do not allow spray or drift to contact tree foliage or fruit as injury will result.

Rate: Mix .6 lb. or 1 cupful per gallon of water.

**TO PREVENT SPROUTING OF TREE STUMPS:** Apply dry "Ammate" X liberally on freshly cut stump surface especially around the outer edge, or spray surface thoroughly.

Rate: Mix 4 lbs. per gallon of water.

**TO KILL UNDESIRABLE TREES:** Make a continuous cut or "frill" around the base of the tree with downward axe strokes, cutting into the sapwood.

Rate: Apply dry "Ammate" X as a continuous band in the frill with solution of 4 lbs. of "Ammate" X per gallon of water.

**IMPORTANT:** Wash sprayer thoroughly after use to remove all "Ammate" X and to reduce corrosion. "Ammate" X absorbs moisture readily; keep package tightly closed.

**NOTE:** 1 lb. is equivalent to 1 3/4 cupfuls.
