WEED'N'GREEN

IMPROVED WEED'N'GREEN TURFOOD AND WEED CONTROL

FERTILIZER ANALYSIS 10-6-4
*PLUS CHICKWEED KILLER (2, 4, 5-TP)
CONTROLS CHICKWEED AND BROADLEAF WEEDS AND FERTILIZES
YOUR LAWN IN ONE EASY APPLICATION.

25 POUNDS TREATS 2,500 SQUARE FT.

CAUTION: Avoid contact with skin, eyes or clothing. Wash hands after using.
Vapors from this product may injure susceptible plants in the immediate vicinity.
Do not store near other fertilizer, seeds, insecticides or fungicides. Clean lawn
spreader thoroughly after using by washing with strong spray from garden hose
and wipe dry. Do not contaminate water used for irrigation or domestic purposes.
Do not reuse empty containers. Destroy by burying with wastes or by burning. Stay
away from smoke.

DIRECTIONS

READ THESE ENTIRE DIRECTIONS AND WARRANTY OF SALE. USE STRICTLY
IN ACCORDANCE WITH LABEL CAUTIONS, WARNINGS, AND DIRECTIONS.

TO CONTROL many broadleaved weeds in lawns such as chickweed, dandelion,
plantain and ground hys, to feed the lawn for a thicker, more vigorous turf, make
application as soon as weeds start to grow in the spring. Apply two days after
mowing at the rate of 10 lbs. per 1,000 square feet. This rate of application is
equivalent to about 435 lbs. of 10-6-4 fertilizer and 1.74 lbs. of 2,4-D acid equiv-
alent plus 0.87 lb. of 2,4,5-T propionic acid equivalent per acre. Broadcast evenly
with a lawn spreader when grass is dry and water it in.

If mouse ear chickweed is present in the lawn, it may be necessary to follow up
the fertilizer-herbicide application within 2 to 3 weeks with a 2,4,5-T propionic
spray.

An additional application may be made in late summer or early fall when grasses
begin to grow vigorously. For best results and a more vigorous turf, supplement
with additional application of Agway lawn fertilizer through the growing season.

**NOTE: AVOID DRIFT TO OR APPLICATION ON VALUABLE PLANTS, FLOWERS
AND SHRUBS.** Do not use on new lawns until they have been established for
four to five months. On such tender species as carpet grass, dichondra, bent grass
and St. Augustine grass or clovers, some injury may occur.

SPREADER	Approximate Settings FOR ESTABLISHED LAWN AND TURF AREAS	
	Twice Over Applications	Once Over Applications
Square Application or Broadcast	4	5
Square Application - # per 1000 sq. ft.	2 1/4	3 1/4
Eastern States - # per 1000 sq. ft.	2 1/4	3 1/4
Western States - # per 1000 sq. ft.	2 1/4	3 1/4

WARRANTY - We warrant that the product conforms to its chemical description
and that it is suitable for the uses stated on the label when used in accordance
with the directions. We do not warrant that the product will kill every
weed or that it will make the lawn thicker or more vigorous. We do not
warrant that the product will protect the lawn from insects or diseases.
We do not warrant that the product will protect the lawn from frost or
other weather conditions. We do not warrant that the product will protect
the lawn from fire or other causes of damage. We do not warrant that
the product will protect the lawn from any other cause of damage.
We do not warrant that the product will protect the lawn from any other
cause of damage.
