This product is a special fungicide dust for application on whole or cut potato tubers for the control of Fusarium seed-piece decay and seed-borne common scab.

Use 1 lb. of product per 100 lbs. of whole or cut potato seed-pieces. Apply the dust so that the entire surface of the seed-piece is thoroughly covered by the fungicide dust.

Treated seed may be held for a week or longer at cool temperature and high relative humidity to aid suberization, or it may be planted immediately.

Do not use treated seed potatoes for food or feed purposes.

NOTE: This pesticide is to be sold ONLY in this original unbroken package.
