For use as a space spray above stored bulk beans, peas, barley, birdseed mixtures, buckwheat, corn, oats, rice, rye, grain sorghum and wheat, fog or mist after closing warehouse or room. Repeat every two weeks during warmer months or as infestation of moths begins on surface of the stored grain. Foggers such as TIFA or Swing Fog, or mist units such as the Microsol machine or ceiling mounted sprayers that produce a fine mist may be used for applying Agway Space Spray.
