

Poison Ivy, Woody Plants, Walks, Fences, Ornamental Garden Edges and Stumps.

A contact, non-residual, water soluble weed and brush killer solution. May be applied adjacent to trees and shrubs following directions.

ACTIVE INGREDIENT:

Ammonium Sulfamate 46.5%

INERT INGREDIENTS 53.5%

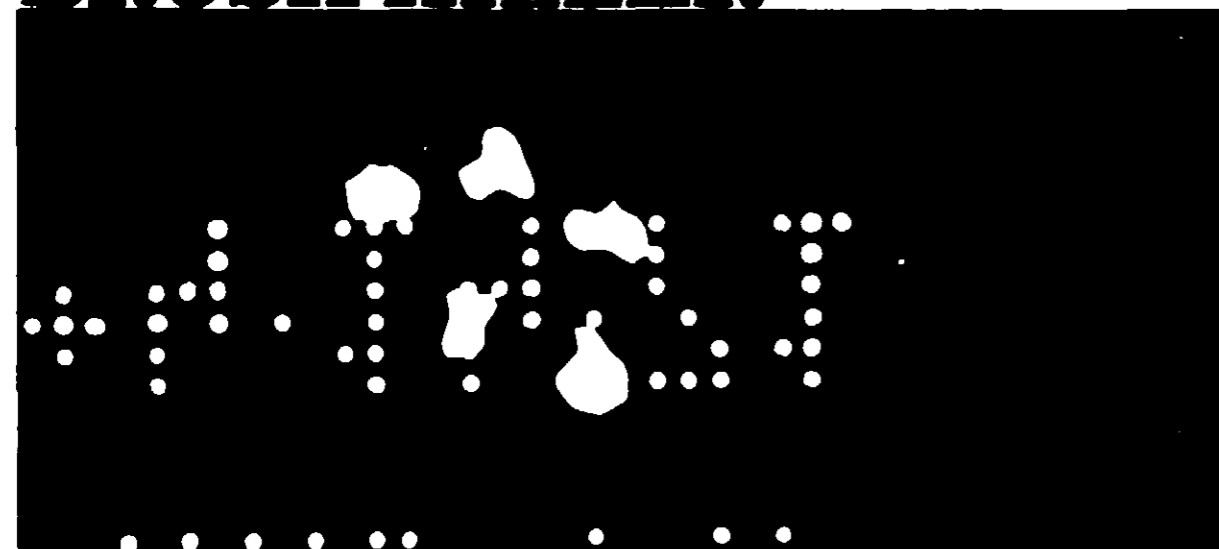

10.9 lbs./gal. @ 60°F.

Ammate® registered trademark of E. I. DuPont de Nemours & Co., Inc.

CAUTION: KEEP OUT OF REACH OF CHILDREN

May cause skin irritation. Avoid contact with skin. In case of contact, wash off with plenty of water.

AMMATE® WEED & BRUSH KILLER

Net Contents
1 Quart

USAGE CAUTION

Do not reuse empty container. Destroy it by burying 18 inches deep in land away from water supply.

Ammate Weed and Brush Killer is non-selective; do not apply to or drain, or flush equipment on desirable plants or vegetation, as injury may result. Do not drain or flush equipment near domestic waters. Ammate solution is caustic to metal. Wash sprayer inside and outside thoroughly after use to remove all herbicidal solution and to reduce corrosion. It may be applied from a sprayer or sprinkling can. Do not apply to desirable plants to avoid injury. Coarse sprays are less likely to drift.

GENERAL DIRECTIONS

This product is highly effective for killing undesirable woody plants and for use as a contact spray for control of weeds and grasses. Temporary non-productivity of soil may be caused by heavy applications of the product; this condition usually disappears in the "over-winter" period. Some species of woody plants and perennial weeds are difficult to control, and retreatment may be necessary if regrowth occurs.

DIRECTIONS

READ THESE ENTIRE DIRECTIONS AND WARRANTY OF SALE. USE STRICTLY IN ACCORDANCE WITH LABEL CAUTIONS, WARNINGS AND DIRECTIONS.

For control of woody plants, tree sprouts, brambles, and other brush, use one quart in two gallons of water. Apply as a drenching spray after foliage is well developed. Wet foliage thoroughly. For best results, spray during periods of high humidity. Respray if any recovery is noted.

For poison ivy apply as a coarse spray, 1 qt. in 2 gals. of water, when poison ivy plants are in full leaf. If poison ivy plants are growing on tree

trunks, spray only if bark of tree is well developed and shows no green. Avoid excessive wetting of bark as injury may result. Do not allow spray to contact tree foliage.

DRIVEWAYS, WALKS, TRIM UNDER FENCES, FLOWER BED EDGES To kill vegetation in driveways, walks, under fences, trim around flower beds, tennis courts and similar locations, use one quart per gallon of water for 200-250 sq. ft. Apply uniformly with a sprinkling can or sprayer. The degree of control and duration of effect will vary with weed species, rainfall, temperature, and other conditions. Retreat if regrowth occurs.

UNDESIRABLE TREES—STUMPS To prevent sprouting of tree stumps, apply Ammate Liquid liberally on freshly cut stump surface especially around the outer edge with a solution of 3 qts. of Ammate Weed and Brush Killer per gallon of water.

To kill undesirable trees, make a continuous cut around the base of the tree with downward slanting strokes, cutting into the sapwood. Saturate with solution containing 3 quarts of Ammate Weed and Brush Killer per gallon of water.

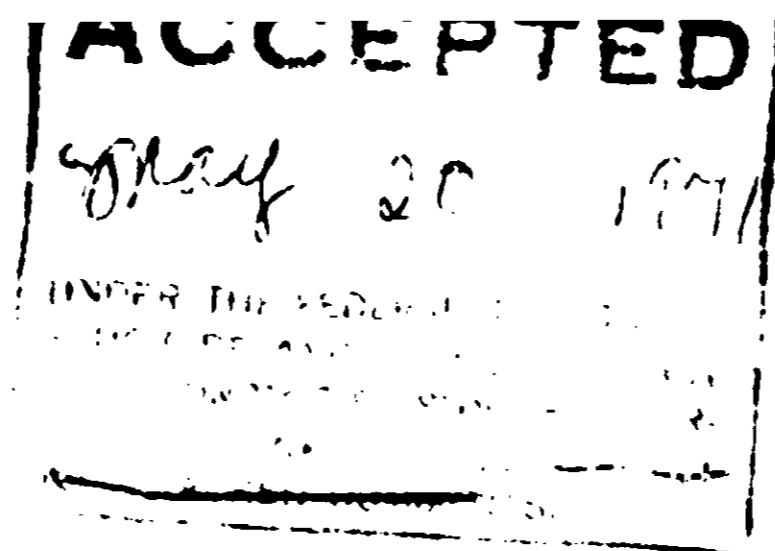

WARRANTY: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use. Any damages arising from a breach of this warranty shall be limited to direct damages, and shall not include consequential commercial damages such as loss of profits or values, etc.

NOTE: This pesticide is to be sold only in this original, unbroken package
