

CAUTION: MAY BE HARMFUL IF SWALLOWED. Do not take internally. In case of eye contact, flush contaminated eyes with plenty of water, and get medical attention if irritation persists. Wash thoroughly after handling. Wash contaminated clothing before re-use. Keep away from food, feedstuffs and domestic water supplies.

NOTE TO PHYSICIAN: Active ingredient is a cholinesterase inhibitor. Treat symptomatically. Atropine is an antidote.

This product is toxic to fish, wildlife and birds. Do not contaminate water by cleaning of equipment or disposal of wastes. Keep out of any body of water. Do not apply where runoff is likely to occur. Apply this product only as specified on this label.

Do not reuse this empty container. Destroy by burying with wastes or burning. Stay away from smoke.

DIRECTIONS

READ THESE ENTIRE DIRECTIONS AND WARRANTY OF SALE. USE STRICTLY IN ACCORDANCE WITH LABEL CAUTIONS, WARNINGS AND DIRECTIONS.

For control of ants, brown dog ticks, chinch bugs, cutworms, earwigs, sod webworms, lawn moths and similar. Apply Dursban 1G granular insecticide uniformly to home lawns and other ornamental and recreational turf grass areas using any hand or power operated gravity or rotary type spreader designed for application of granular materials. Treat when insects first appear using Dursban 1G at the rate of 110 pounds per acre or 2½ lbs. per 1,000 square feet.

For control of certain white grubs (larvae of Japanese beetle, European Chaffer, and turfgrass (Hyperodes) weevil). Apply twice the amount of Dursban 1G granular insecticide uniformly to home lawns and other ornamental and recreational turfgrass areas. Refer to spreader setting chart for application of granular materials. Treat when insects first appear and when grubs are small feeding near the soil surface where two grubs per square foot of sparse lawn or four grubs per square foot of vigorous lawn are found in any digging (usually during August). Apply Dursban 1G at the rate of 5 lbs. per 1,000 sq. ft. or 220 lbs. per acre.

METHOD: To help obtain uniform distribution, apply one-half the required amount of product in one direction; then apply the balance at a right angle. Immediately after application sprinkle the turf with 1,300 gallons of water per acre (sufficient water to soak the top 2-3 inches of soil) so as to wash the granules into the zone of insect infestation. Consult the following table below to determine amounts of Dursban 1G and water needed for small sized areas. Re-treat as necessary.

RATES TO USE

Area to be Treated	Pounds of Dursban 1G	Gal. of Water to Sprinkle on Turf after Treatment
1,000 sq. ft.	2½	30
5,000 sq. ft.	12½	150
10,700 sq. ft.	25	315
