STORAGE AND DISPOSAL: Do not reuse empty bag. Dispose of through regular refuse collection system. Do not contaminate feed, seed or foodstuffs. Store in a dry place.

DIRECTIONS

READ THESE ENTIRE DIRECTIONS AND DISCLAIMER. USE STRICTLY IN ACCORDANCE WITH LABEL CAUTIONS, WARNINGS AND DIRECTIONS.

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

GENERAL INFORMATION: Agway Crabgrass Killer with Balan has the following advantages:

- Convenient & Economical** - Saves time, work and money.
- Good Safety Margin for Plants** - Applied as directed, will not injure perennial bluegrass, perennial ryegrass, fescue, bermudagrass, zoysiagrass, St. Augustinegrass, centipedegrass and Bahiagrass. Do not apply to newly sprigged areas of bermuda, St. Augustine, or centipede grasses. Do not apply to bentgrass or dichondra turf. Do not apply to new lawns started the previous fall.
- Establishes a Weed Control Zone** - Agway Crabgrass Killer with Balan establishes a weed control zone by killing certain annual weed seeds as they germinate.
- Weeds Controlled** - Application prior to weed germination will prevent smooth crabgrass, hairy crabgrass, poa annua, barnyardgrass, (watergrass), yellow and green foxtail, goosegrass (silver crabgrass or crowsfoot).

WHEN TO APPLY:

For Crabgrass Control - Apply Agway Crabgrass Killer with Balan in the spring before crabgrass germinates. Reseeding should be delayed for 90 to 120 days after application.

For Poa Annua Control - Apply Agway Crabgrass Killer with Balan in late summer to early fall (mid-July to mid-September when night temperatures are in the 60's for 5-7 days) or in early spring prior to annual bluegrass (Poa Annua) seed germination. Reseeding should be delayed for 90 to 120 days after application.

HOW TO APPLY:

It is important that Agway Crabgrass Killer with Balan be applied over your lawn without skips or misses. Determine the correct amount for your lawn area. Do not over-apply or under-apply. The contents of one bag should be applied as follows:

For Crabgrass & Poa Annua Control apply one bag for every 5,000 sq. ft. (40# treats 10,000 sq. ft.) of lawn area.

- Using a spreader set for the proper one-half rate (see table for spreader settings) spread one-half of the required amount for your lawn moving at a steady rate in one direction.
- Spread the other half of the required amount over the same area moving across or at right angles to the first application. (This minimizes skips and overlaps, insuring good coverage.) When turning or stopping spreader spreader gate should be closed.

SPREADER SETTINGS:

The settings listed below are calculated to apply Agway Crabgrass Killer with Balan one-half rate, as directed above. Check application rate of your spreader before applying.

Settings may vary with type, age and condition of spreader

SPREADER	APPROXIMATE SETTING (For two passes)
Squire Applegate	Once Over
Cross Country	Once Over
Jackson	Once Over
Cyclone	Once Over

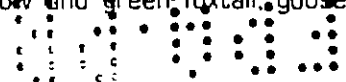

DISCLAIMER: Buyer assumes all risks of use, storage or handling not in strict accordance with directions given herewith

NOTE: This pesticide is to be sold ONLY in this original, unbroken package

DIRECTIONS

READ THESE ENTIRE DIRECTIONS AND DISCLAIMER. USE STRICTLY IN ACCORDANCE WITH LABEL CAUTIONS, WARNINGS AND DIRECTIONS.

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

GENERAL INFORMATION: Agway Crabgrass Killer with Balan has the following advantages:

- Convenient & Economical** - Saves time, work and money.
- Good Safety Margin for Plants** - Applied as directed, will not injure perennial bluegrass, perennial ryegrass, fescue, bermudagrass, zoysiagrass, St. Augustinegrass, centipede grass and Bahiagrass. Do not apply to newly sprigged areas of bermuda, St. Augustine, or centipede grasses. Do not apply to bentgrass or dichondra turf. Do not apply to new lawns started the previous fall.
- Establishes a Weed Control Zone** - Agway Crabgrass Killer with Balan establishes a weed control zone by killing certain annual weed seeds as they germinate.
- Weeds Controlled** - Application prior to weed germination will prevent smooth crabgrass, hairy crabgrass, poa annua, barnyardgrass (watergrass), yellow and green foxtail, goosegrass, silver crabgrass, or crowfoot.

WHEN TO APPLY:

For Crabgrass Control - Apply Agway Crabgrass Killer with Balan in the spring before crabgrass germinates. Reseeding should be delayed for 90 to 120 days after application.

For Poa Annua Control - Apply Agway Crabgrass Killer with Balan in late summer to early fall (mid-July to mid-September when night temperatures are in the 50's for 5-7 days) or in early spring prior to annual bluegrass (Poa Annua) seed germination. Reseeding should be delayed for 90 to 120 days after application.

HOW TO APPLY:

It is important that Agway Crabgrass Killer with Balan be applied evenly and without skips or misses. Determine the correct amount for your lawn area. Do not over-apply or under-apply. The content of this bag will treat approximately 5,000 sq. ft. of lawn area.

For Crabgrass & Poa Annua Control apply one-half rate (one-half of 40#) - treats 10,000 sq. ft. of lawn area.

- Using a spreader, set for the proper one-half rate (one-half of 40#) spreader settings, spread one-half of the required amount of Agway Crabgrass Killer with Balan at a steady rate in one direction.
- Spread the other half of the required amount over the same area moving across or at right angles to the first application. (This minimizes skips and overlaps, insuring good coverage.) When turning or stopping, spreader gate should be closed.

SPREADER SETTINGS:

The settings listed below are calculated to apply Agway Crabgrass Killer with Balan one-half rate, as directed above. Check application rate of your spreader before applying.

Settings may vary with type, age and condition of spreader.

SPREADER	APPROXIMATE SETTING (For two passes)
Squire Applegate	Once Over
Cross Country	Once Over
Jackson	Once Over
Cyclone	Once Over
