DIRECTIONS FOR USE:

READ THESE ENTIRE DIRECTIONS AND DISCLAIMER. USE STRICTLY IN ACCORDANCE WITH LABEL CAUTIONS, WARNINGS, AND DIRECTIONS.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

Do not reuse empty bag. Dispose of through regular refuse collection system.

GENERAL INFORMATION:

Agway Greenlawn Plus 21-5-7 Fertilizer with Balan Crabgrass Killer has the following advantages:

- Convenient and Economical** — Saves time, work and money.
- Good Safety Margin for Plants** — Applied as directed, will not injure perennial bluegrass, perennial ryegrass, fescue, bermudagrass, zoysiagrass, St. Augustinegrass, centipedegrass and Bahiagrass. Do not apply to newly sprigged areas of bermuda, St. Augustine, or centipede grasses. Do not apply to bentgrass or dichondra turf. Do not apply to new lawns started the previous fall.
- Establishes a Weed Control Zone** — Agway Greenlawn Plus 21-5-7 Fertilizer with Balan Crabgrass Killer establishes a weed control zone by killing certain annual weed seeds as they germinate.

- Weeds Controlled** — Application prior to weed germination will prevent growth of weeds that crabgrass, poa annua, water grass (Barnyardgrass), yellow foxtail, goosegrass, large crabgrass or crowfoot.
- Fertilizes** — A balanced fertilizer containing Nitrogen, phosphate and potash promotes controlled release of nitrogen to maintain a green lawn when applied according to directions.

WHEN TO APPLY:

For Crabgrass Control — Apply Agway Greenlawn Plus 21-5-7 Fertilizer with Balan Crabgrass Killer in the spring before crabgrass germinates (before Forsythia blossoms fall). Re-seeding should be delayed for 90 to 120 day after application.

For Poa Annua Control — Apply Agway Greenlawn Plus 21-5-7 Fertilizer with Balan Crabgrass Killer in late summer to early fall (mid-July to mid-September) when night temperatures are at least in the 60's for 5-7 days, or in early spring prior to annual bluegrass (Poa Annua) seed germination.

HOW TO APPLY:

It is important that Agway Greenlawn Plus 21-5-7 Fertilizer with Balan Crabgrass Killer be applied over your lawn without skips or misses. Determine the correct amount for your lawn area. Do not over-apply or under-apply. The contents of one bag should be applied as follows:

For Crabgrass, Poa Annua and other listed susceptible weeds — apply one bag for every 465 square meters (5,000 sq. ft.) of lawn area. 2.25 kg/100 square meters. (4.6#/1,000 sq. ft.)

- Using a spreader set for the proper one-half rate (see table for spreader settings) spread one-half of the required amount for your lawn moving at a steady rate.
- Spread the other half of the required amount over the same area moving across or at right angles to the first application. (This minimizes skips and overlaps, insuring good coverage.) When turning or stopping spreader, spreader gate should be closed.

SPREADER SETTING:

The settings listed below are calculated to apply Agway Greenlawn Plus 21-5-7 Fertilizer with Balan Crabgrass Killer at one-half rate, twice over as directed. Check application rate of your spreader before applying. Settings may vary with type, age and condition of spreader.

SPREADER SETTING GUIDES:

Spreader	Double Application (twice over)	Single Application (once over)
Agway (or Jackson)	5	7
Agway #B (or Cyclone)	4	5
Cross Country	4 1/2	6
Scott (Drop)	4 1/2	6

Note: These settings are furnished as a guide only. Age, condition of spreader, speed of operation and roughness of terrain can cause variation in rates applied.

DISCLAIMER: Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.

NOTE: This pesticide is to be sold ONLY in this original unbroken package.
