KEEP OUT OF REACH OF CHILDREN.

WARNING

PRECAUTIONARY STATEMENTS

Hazards To Humans & Domestic Animals

MAY BE FATAL IF SWALLOWED

CAUSES EYE IRRITATION

WARNING: Do not take internally. Do not breathe dust. Do not get in eyes, on skin, or on clothing. Wear a NIOSH approved mask suitable for protection against inhalation of toxic dusts to prevent exposure during use. Wash thoroughly after handling and before eating or smoking. Remove and wash contaminated clothing before reuse. In case of contact, immediately flush eyes with plenty of water and get prompt medical attention if irritation develops or persists. Wash contaminated skin with soap and plenty of water.

NOTE TO PHYSICIAN: Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatically. Atropine only by injection is an antidote.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and other wildlife. Do not apply directly to water.

Do not contaminate water by cleaning of equipment or disposal of wastes. Use this product only as specified on this label.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

General Information

LORSBAN* 50-SL insecticide is a wettable powder formulation designed for slurry treatment of seed prior to planting to protect the germinating seeds and seedlings against injury by seed-corn maggots and seed-corn beetles. LORSBAN* 50-SL may be applied in combination with Captan, Chloroneb or Thiram fungicides if protection of the seed from fungi, which may cause disease or rot, is also desired.

Seed treated with LORSBAN* 50-SL may be stored for up to 14 months without loss of insecticidal effectiveness.

Use and Dosage Recommendations — Field beans, green beans, kidney beans, lima beans, Navy beans, snap beans, edible soybeans, string beans, wax beans, field corn, sweet corn, cucumbers, dill, lentils, black-eyed peas, cowpeas, field peas, garden peas, okra and pumpkins (for control of seed-corn maggots and seed-corn beetles): Use 2 ounces of LORSBAN* 50-SL per 100 pounds of seed by applying to the seed as a slurry treatment prior to planting.

Slurry Treatment — Disperse the required amount of LORSBAN* 50-SL in a water solution containing 0.5% by weight of METHOCEL* A4C Premium methylcellulose or other acceptable sticking agent. Use 12 to 15 fluid ounces of solution for each 100 pounds of seed to be treated. Generally, rough surfaced seeds such as corn will require a greater volume of solution for complete coating than smooth surfaced seeds such as beans. If a fungicide is used, it should be added to the slurry in accordance with its label directions. Mix the slurry with the seed using a rotating blender or other suitable mixing equipment that will ensure each seed is uniformly coated. **DO NOT MIX THE SEED AND PRODUCT WITH BARE HANDS.**

Use Restrictions

Do not use treated seed for human consumption, as feed for livestock or poultry, or for oil purposes. Label treated seed as follows: TREATED SEED. DO NOT USE FOR FOOD, FEED, OR OIL.

STORAGE & DISPOSAL

Pesticide or slurry that cannot be used according to label instructions must be disposed of according to applicable Federal, State or Local procedures.

Completely empty bag by shaking and tapping sides and bottom to loosen clinging particles. Empty residue into application equipment. Then dispose of bags in a sanitary landfill or by incinerator if allowed by State and Local authorities.

NOTE: This pesticide is to be sold ONLY in this original, unbroken package.

DISCLAIMER: Buyer assumes all risks of use, storage or handling not in strict accordance with directions given herewith.
