DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

FLY & MOSQUITO CONTROL

Mosquito Larvae in standing water (intermittently flooded areas, stagnant water, temporary rainpools): Apply Malathion 5 lb. E.C. at the rate of 13 fluid oz. (approximately 1/2 lb.) per acre. Mix in sufficient water or oil. Apply by air or ground equipment.

OUTDOORS - Mosquitoes, flies, and small-flying insects: As a spray dilute Malathion 5 lb. E.C. 1 part to 28 parts water, fuel oil or diesel oil. Avoid applying oil based formula to valuable ornamental plants as injury may occur.

Shrimp and crab may be killed at application rates recommended on this label. Do not apply where these are important resources.

STORED GRAIN: In barley, corn, grain, sorghum, oats, rye, wheat and garden seeds for control of confused flour beetle, granary weevil, sawtoothed

grain beetle, flat grain beetle, red flour beetle, rusty grain beetle, lesser grain borer and Indian meal moth apply

as follows:

Residual spray for treating surfaces prior to storage: Apply to walls, floors, machinery in grain elevators, truck beds, box cars or ships' holds using 1 gallon in 25 gallons of water. Make a complete coverage application after thoroughly cleaning the area to be sprayed. Remove and burn all sweepings and debris.

Grains going into storage: Apply 1 pint in 2-3 gallons of water per 1,000 bushels. Apply as the grain is being loaded or being turned into final storage.

After grains are stored: To control Indian meal moth apply 1/2 pint in 1-2 gallons of water per 1,000 square feet of grain surface area. Apply evenly over the grain surface immediately after storing and repeat if necessary.
