

For inhibition of microbiological growths (algae, fungi and bacteria) in industrial cooling waters, air washers and similar applications.

### **Use and Application:**

Dosage and method of application of MOGUL AG-471 will depend upon the equipment to be treated, the type of microbiological life involved, and various environmental conditions such as temperatures, type of nutrients or contaminants present in the system, etc.

The dosages given here are representative averages only and may vary considerably in specific individual cases. Detailed directions for the use of MOGUL AG-471 have been sent in a separate letter. Refer to this letter before using. Use only as directed in this letter or as by our authorized representative.

Industrial Cooling Water — to inhibit microbiological growth, use an initial dosage of 1 to  $11_2$ gallons of MOGUL AG-471 per 1000 gallons of water contained in the system. Then, continue with periodic dosages of 1 to 112 quarts of MOGUL AG-471 per 1000 gallons of contained water. Intervals between dosages will normally be 5 to 10 days.

Air Washers — dosage requirements for air washers are similar to those for industrial cooling water systems. However, in some systems, local conditions may require much higher dosages or more frequent treatment. Follow the specific directions supplied by letter from the Company, or by its authorized representative.

#### Handling Precautions: **CAUTION:** Keep out of the reach of children.

Harmful if swallowed. Do not take internally.

Avoid contact with the skin or eyes. In the event of contact, wash skin with soap and water; for eyes, flush thoroughly with clean water and get medical attention if irritation persists for more than a few minutes.

In the event of contact with clothing, remove contaminated clothing and wash thoroughly with soap and water before reuse.

Avoid storage near animal feed or food products.

## **Ingredients:**

Active --n-Alkyl (60'  $\in$  C<sub>14</sub>, 30'  $\in$  C<sub>16</sub>, 5'  $\in$  C<sub>12</sub>, 5'  $\in$  C<sub>18</sub>) dimethyl benzyl ammonium chlorides Bis (tri-n-butyltin) oxide Inert
