MOGUL AG-416

To control algae in industrial cooling water systems of the recirculating type. For example: wooden cooling towers, metal cooling towers and evaporative condensers.

Use and Application:

Before algae starts add MOGUL AG-416 to control algae. Badly fouled systems must be cleaned before treatment is begun. This product should be applied to the sump near the pump suction or directly to the recirculating line.

Initial dosage: when the system is noticeably fouled, apply a dose of 51 to 64 fluid ounces (400 to 500 ppm) of MOGUL AG-416 per 1,000 gallons water in the system. Repeat until control is achieved.

Subsequent dosage: when microbial control is evident, add 13 to 26 fluid ounces (100 to 200 ppm) of MOGUL AG-416 per 1,000 gallons water in the system every 7 days (weekly) or as needed to maintain control.

Handling Precautions:

WARNING: KEEP OUT OF REACH OF CHILDREN.

Harmful if swallowed.

If irritation persists, get medical attention.

May cause skin irritation.

Causes severe eye irritation.

Do not get in eyes, on skin or on clothing.
