PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION

May be harmful if swallowed, inhaled or absorbed through the skin. Do not contaminate feed or food. Avoid prolonged contact with skin. Wash thoroughly after using and before eating or sleeping. May cause eye irritation. Avoid eye contact.

Symptom of Poisoning: Aversion to light, lacrimation, bestial sweating, intracardial pupillary dilatation, prostration, respiratory depression.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and wildlife and is extremely toxic to aquatic invertebrates. Keep out of lakes, streams and ponds. Do not contaminate water by cleaning of equipment or disposal of wastes. Runoff on treated areas may be hazardous to aquatic organisms in neighboring areas. Do not apply under weather conditions favoring drift from treated areas. Birds and other wildlife feeding in treated areas may be killed.

STATEMENT OF PRACTICAL TREATMENT

SWALLOWED: Call a physician or poison control center immediately. If possible, vomiting should be induced under medical supervision. Drink water or two glasses of water and induce vomiting by forcing the back of the throat with finger. Do not induce vomiting or give anything by mouth to unconscious or comatose person.

INHALED: Remove to fresh air. Treat as appropriate for respiratory distress.

ON SKIN: Remove contaminated clothing and wash affected areas with soap and water.

IN EYES: Flush eyes with plenty of water. Get medical attention if irritation persists.

NOTE TO PHYSICIAN: Atropine. Atropine is a parasympatholytic anticholinergic. It is an antidote and may be administered in conjunction with Atropine only. Symptoms of cholinergic excess and their treatment are present.
