**BEANS.** On the 2nd Dec'th 1878, 100 pounds of castor oil were applied to 100 bushels of beetles, which were then scattered over the ground. The same Beans had been sown in the field, and caterpillars and flea beetles, Japan beetles, 10 lbs. per acre, Corn Earworm, Armyworm, Tarnished Plant Bug, etc., 10 lbs. per acre, 100 lbs. per acre, to 100 bushels of corn, and the Lima Bean Plant, and 100 bushels of Beans, were scattered over the ground.

**COTTON** Every year of my life I have been a cotton farmer except for the first two years. I have never had a white cotton field. I have had late season cotton, early season cotton, and cotton that has been raised in the fall. I have never had a white cotton field.

**TOBACCO** is a plant belonging to the family Solanaceae, which also includes the potato, eggplant, bell pepper, tobacco, tomato, and other plants. The tobacco plant is a leafy, upright, annual or biennial herb, growing from 1 to 3 meters tall. The leaves are opposite, elliptical, thickish, green, deeply lobed, and have prominent veins. The flowers are small, white, and bell-shaped, with five petals. The fruit is a small, round, brown, seed-filled capsule.

The following table gives the results of the experiments on the effect of the different treatments on the yield of the various species.
