

USDA Reg.
No. 8620-40

DIRECTIONS FOR USE *

LEAF SPOT CONTROL ON PEANUTS: Mix 2 to 3 quarts of TC-90[®] in 10 to 25 gallons of water and apply to one acre. Begin treatment 2 weeks before disease normally appears for best preventative control or make first application when disease is first noted. Apply at 14 day intervals after first application.

Consult your local agricultural authorities or State Extension Service for additional information as to timing, number, and rate of applications.

TC-90[®] is compatible with Maneb, Captan, Phaltan, DDT, Toxaphene, Thiodan, organic phosphates used with other fungicides and insecticides with caution.

OBSERVE ALL CAUTIONS AND LIMITATIONS ON LABELING OF ALL PRODUCTS USED IN MIXTURES.

CAUTION: KEEP OUT OF REACH OF CHILDREN

NOTICE: Seller guarantees the material sold to be true to label. Further than that it makes no representation or warranty and it shall not be held responsible for any injury resulting from the use or handling of said material whether used in accordance with directions or not. Soil and Environmental conditions and other factors beyond the seller's control having much to do with results, the buyer accepts and uses this material subject to the above terms.

* Pour TC-90[®] into water with spray tank agitation to form best emulsion. After emulsion is formed, agitation is not required.

BIG BOY

TC - 90[®]

EMULSIFIABLE LIQUID COPPER FUNGICIDE

ACTIVE INGREDIENTS:

Active Copper Salts of Fatty & Rosin Acids
(Equivalent to Copper as Metallic 4.0%)
