ENVIRONMENTAL HAZARD

This product is toxic to fish. Apply this product only as specified on this label.
Do not contaminate water by cleaning of equipment, or disposal of wastes.
NOTE: Do not discharge into lakes, streams, ponds, or public waters unless in
accordance with a NPDES permit. For guidance, contact your regional office of the
EPA.

CHEMICAL AND PHYSICAL HAZARDS

Strong oxidizer, mix with water only. Reaction with combustible organic
materials, bases, moisture or with acidifiers may generate heat, hazardous gases and,
possibly, fire or explosion. Do not add to dispensers or other equipment that is
not dry and clean of any chemical remnants. Does not burn, but will decompose
from about 325°F (160°C), releasing toxic gases. Avoid comminution and dusting.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.
STORAGE: Store in cool, dry, well-ventilated area, in well-closed original
containers, away from energy sources, combustible organic materials, oxidizers,
acids, bases, and moisture. When handling or dealing with spills, use impact-resistant
goggles with side shields or face shield; body-covering clothes, including impervious
rubber or plastic gloves and boots; use a dust respirator if dusting occurs.
BEST-LIKE DISPOSAL: Pesticide wastes are acutely hazardous. Improper
disposal of excess pesticide, spray mixture, or residue is a violation of Federal Law.
If these wastes cannot be disposed of by use according to label instructions, contact
your State Pesticide or Environmental Control Agency, or the Hazardous Waste
representative at the nearest EPA Regional Office for guidance.
CONTAINER DISPOSAL: Completely empty liner by shaking and tapping sides
and bottom to loosen clinging particles. Empty residue into application
equipment. Then dispose of liner and punctured drum in a sanitary landfill or by
incineration if allowed by State and local authorities, or by burning. If burned,
stay out of smoke. Do not reuse container.
SPILLS: Sweep up dry spills and dispose of as described for pesticide disposal. If
drum contents are contaminated or decomposing, do not reveal container; isolate
unopened drum in the open or a well ventilated area; flood with large volumes of
water if necessary.
IN CASE OF FIRE: Do not use ammonium phosphate extinguisher near water and
Halobrom. * * * * * Serious reactions may occur.

STATEMENT OF PRACTICAL TREATMENT

If in eyes: Flush eyes immediately with plenty of water for at least 15 minutes
and get medical attention at once.
If on skin: Wash immediately with soap and plenty of water. Remove and wash
contaminated clothing before reuse.
If swallowed: Give large amounts of water to dilute the toxicant.
If immediately available, desiccants like milk,
vegetable oil or egg whites can be given. Do not
induce vomiting as it is likely to cause
considerable mucosal damage.
If inhaled: Remove person to fresh air immediately. Get medical attention at
once.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product
in a manner inconsistent with its labeling.

INDUSTRIAL RECIRCULATING COOLING WATER SYSTEMS: Used
effectively at dosages recommended to achieve
exposures to one part per million (ppm) of 'active'
residual bromine to control algal, bacterial and
fungal slimes in industrial cooling towers; influent
water systems, e.g., flow-through filters, and
lagoons, etc.; heat-exchange water systems;
industrial water scrubbing systems; brewery
pasteurizers, and industrial air-washing systems
equipped with a mist eliminator.

Dosage Rates

Initial dose: When noticeably fouled, add 2-6 lbs
per 10,000 gallon of water contained in the system.
Repeat initial dosage until one ppm of 'active'
residual bromine is established for at least 4
hours.

Subsequent dose: When microbial control is evident,
add 1-3 lbs/10,000 gallons of water contained in the
system. Repeat as needed to maintain one ppm of
'active' residual bromine for at least 4 hours.

ONCE-THROUGH INDUSTRIAL COOLING WATER SYSTEMS:

Used for the control of algal, bacterial and fungal
slimes, by adding to the system inlet, or before any
other contaminated area in the system, in
once-through and closed-cycle fresh and sea water
cooling systems; cooling ponds; canals; and lagoons.

Dosage Rates

Initial dose: When noticeably fouled, add 2-6 lbs
per 10,000 gallon of water contained in the system.
Repeat initial dosage until one ppm of 'active'
residual bromine is established for at least 4
hours.

Subsequent dose: When microbial control is evident,
add 1-3 lbs/10,000 gallons of water contained in the
system. Repeat as needed to maintain one ppm of
'active' residual bromine for at least 4 hours.
