HALOBROM

MINI SLOW DISSOLVING BROMINATING TABLETS FOR POOL & SPA

NET WEIGHT 10 LBS

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.
PRACTICAL TREATMENT (FIRST AID) If swallowed, feed bread soaked in milk followed by olive oil. Call a physician immediately. If on skin, brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in eyes, flush with cold water for at least 15 minutes. Get medical attention.

ENVIRONMENTAL HAZARDS This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES permit. For guidance, contact the Regional Office of EPA.
PHYSICAL AND CHEMICAL HAZARDS **STRONG OXIDIZING AGENT**. Mix only with water. The clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to a fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion.
SPECIAL PRECAUTIONS PLEASE READ BEFORE OPENING CONTAINER
PREVENTION OF PHYSICAL INJURY
 1. This product emits a powerful bromine gas. Do not open container indoors. Hold away from face when opening to avoid breathing fumes.
 2. This product is dangerous when not used properly.
MISUSE MAY RESULT IN SERIOUS PERSONAL INJURY REQUIRING HOSPITALIZATION
RELATED COMPLICATIONS MAY LEAD TO DEATH
 Do not mix with any other chemicals.
 Do not mix with any other chemicals.
 Do not add water to this product.
 Do not add this product to water or spa.
 Do not take product from others.
 Do not take label instructions exactly.
 Do not experiment. Follow label instructions exactly.
PREVENTION OF PROPERTY DAMAGE Contact between this product and any undissolved material in the container may result in permanent staining of the container.
STORAGE AND DISPOSAL
 Do not contaminate water, food or feed by storage or disposal.
STORAGE Store in cool, dry, well ventilated area. In well closed original containers. Avoid sources of combustible organic materials, oxidizers, strong bases, and moisture.
PESTICIDE DISPOSAL Water resulting from the use of this product may be disposed of in approved waste disposal facility.
CONTAINER DISPOSAL Place in trash collection or disposal in approved landfill area.
SPILLS Sweep up dry spills and dispose of as described for pesticide disposal. Do not allow contaminated or decomposing, do not reuse containers. Spill cleanup containers in the contaminated area lined with large volume of water is necessary.

DIRECTIONS FOR USE
 It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Halobrom is a safe and effective slow dissolving bactericide, algicide, and disinfectant that unlike other commonly used chemicals performs well over a broad pH range. Use the dosages recommended below as a guide in determining the proper amount of Halobrom necessary to keep your pool or spa sparkling clean and healthy. The dosage necessary for your pool or spa will change considerably depending upon those factors that burden the disinfection system.
 Some of the factors that will vary the required dosages are water temperature, bather load, exposure to windblown debris, thunder or rain storms and length of filtration cycle.
SWIMMING POOLS In newly filled pools to establish an initial bromine residual, shock the pool using Halobrom Brominating Shock treatment. Follow directions for use on the label of that product. This is to establish an effective active bromine residual of between 2 and 3 ppm. Test water frequently using a reliable Bromine Test Kit. Repeat dosage if required until residual is established.
 The following dosages are provided as general rule of thumb.
 Automatic and floating brominators have use instructions peculiar to their design. Frequently a brominator must be sized to capacity every week, while the adjustments allow the user to dose only the total amount of Halobrom necessary for proper sanitation as suggested below. The slow dissolving nature of the chemical combined with the design features of the brominator require that a greater amount of chemical be exposed to the water.
RESIDENTIAL Add 17 tablets per 10,000 gallons every 5-7 days or as needed to maintain a bromine residual of 2-3 ppm at all times. Apply weekly dose through the use of floating tablet feeder such as the Multi-Chlor or an automatic brominator which will allow you to adjust the amount of bromine entering the water.
COMMERCIAL Add 31 tablets per 10,000 gallons every 5 to 7 days or as needed to maintain an active bromine residual of between 3 and 5 ppm at all times.
SPAS AND HOT TUBS Introduce 3 tablets per 300 gallons of spa water with the use of a floating tablet feeder or automatic brominator installed on the spa equipment. Adjust tablet feeder or brominator to obtain an active bromine residual of at least 2 ppm. Maintain spa by adding 3 tablets per 300 gallons every 5-7 days or as needed to maintain an active bromine residual of 2 ppm at all times. Spa water has a tendency to foam and cloud that is directly proportional to the amount of use it receives. This is due to the accumulation of body oils and soaps and contaminants too small for the filtration equipment to remove, and to the rapid escalation of total dissolved solids in the water. To a great extent, defoamer, clarifier, shock treatments and demineralizers or sequestering agents can be used to clear the water. When this becomes impossible, draining, cleaning and refilling the spa will be the most satisfactory way of solving this problem.

Pool Gallon Calculator (all dimensions in feet)
 Square or Rectangular: Length x Width x Average Depth x 7.5 = Gallons
 Round or Oval: Length x Width x Average Depth x 5.9 = Gallons
 Each tablet weighs 46 oz. (28.5 grams)
