**RE: Notification of product label clarification for Ammonium Bromide  
EPA Reg. No. 8622-59.**

Per your telephone conversation with Judy Smith, North American Regulatory Manager, Ameribrom, Inc., 2115 Linwood Ave., Fort Lee, NJ 07024 is submitting a notification to clarify and modify the product label of Ammonium Bromide (EPA Reg. No. 8622-59). One draft label depicts annotated and numbered changes in sequential order. These correspond to the annotated changes indicated in the table.

Annotated Change(s) Made:	Location of Change:	Justification for Change:
1	Panel 1	Drum changed to container because the material can be packaged in various container types, including drum, supersacks, etc.
2	Panel 2	Title to state Ammonium Bromide-Comp to better describe the product's form.
3	Panel 2	Net contents change to blank to allow for various packaging sizes.

The table outlines the each proposed change and provides the justification or basis for the changes that were made to the proposed draft labeling. An effort has been made to update the proposed label, eliminate errors, and bring it into agreement with the requirements per registration letter dated May 5, 2003. The only changes made to the text of the label are those outlined above. The production codes are plant specific; therefore, blank fields have been left on the bottom of panel 2 on the draft label.

If you have any questions regarding this submission, feel free to contact me at 304-720-3924.

Sincerely yours,
