# AMBRICIDE

A BACTERICIDE, SLIMICIDE, AND ALGACIDE FOR TREATING RECIRCULATING COOLING WATER SYSTEMS

ACTIVE INGREDIENT: Ammonium bromide ..... 35%  
INERT INGREDIENTS: ..... 65%  
TOTAL ..... 100%

**KEEP OUT OF REACH OF CHILDREN**  
**CAUTION**

### FIRST AID

<b>If in eyes</b>	<ul style="list-style-type: none"> <li>Hold eye open and rinse slowly and gently with water for 15-20 minutes.</li> <li>Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.</li> <li>Call a poison control center or doctor for treatment advice.</li> </ul>
<b>If inhaled</b>	<ul style="list-style-type: none"> <li>Call poison control center, or doctor immediately for treatment advice.</li> <li>Have person sip a glass of water if able to swallow.</li> <li>Do not induce vomiting unless told to do so by the poison control center or doctor.</li> <li>Do not give anything by mouth to an unconscious person.</li> </ul>
<b>If on skin or clothing</b>	<ul style="list-style-type: none"> <li>Take off contaminated clothing.</li> <li>Rinse skin immediately with plenty of water for 15-20 minutes.</li> <li>Call a poison control center or doctor for treatment advice.</li> </ul>
<b>If swallowed</b>	<ul style="list-style-type: none"> <li>Move person to fresh air.</li> <li>If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.</li> <li>Call a poison control center or doctor for further treatment advice.</li> </ul>
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

### WARRANTY

Seller warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with label directions under normal conditions of use, but neither this warranty nor any other warranty of MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to Seller, and Buyer assumes the risk of any such use.

**DO NOT SMOKE, DRINK, OR EAT WHEN HANDLING**  
**DO NOT SHIP WITH FOODS, FEEDS, DRUGS, OR CLOTHING**  
**KEEP CONTAINER TIGHTLY CLOSED WHEN NOT IN USE**

### STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

**STORAGE**  
Store in a cool, well-ventilated area, in well-closed original containers, away from energy sources, acids, alkaline and heavy metal salts.

**PESTICIDE DISPOSAL**  
Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use in accordance with label instructions, contact your State Pesticide, Environmental Control Agent or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**PLASTIC CONTAINERS**  
Triple rinse (or equivalent). Then offer for reconditioning, or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

**SPILLS**  
When dealing with or handling spills, use impact-resistant goggles with side shields or face shield; body covering clothes, including impervious rubber or plastic gloves and boots; us approved respirator. Absorb on sand or vermiculite and place in closed container and dispose as described for pesticide disposal. If containers are contaminated or decomposing, do not reuse; isolate unsealed container in the open or a well-ventilated area; flood with large volumes of water if necessary.

**PRECAUTIONARY STATEMENTS**  
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**CAUTION**  
CAUSES MODERATE EYE IRRITATION

Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling.

**ENVIRONMENTAL HAZARDS**

This product is toxic to fish and aquatic organisms. Do not contaminate water by cleaning of equipment or disposal of wastes. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

**CHEMICAL AND PHYSICAL HAZARDS**

Avoid contact with strong oxidizers (except when in use), acids, alkaline, and heavy metal salts.

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

AMBRICIDE is to be used in conjunction with an oxidant such as sodium hypochlorite (typically 12.5%) or chlorine gas. It may be added to the process water for which treatment is desired and to any point of uniform mixing. Addition may be continuous or intermittent depending on the severity of the contamination and on other system operation parameters. Consult your feeder manufacturer for correct procedure and proper use of feeder equipment.

**INDUSTRIAL RECIRCULATING COOLING WATER SYSTEMS**

Used effectively at dosages recommended to achieve exposure to 0.3-5.0 parts per million (ppm) of active residual expressed as total chlorine, or as needed to maintain control of algal, bacterial, and fungal slimes in industrial cooling towers, evaporative condensers, heat exchange water towers, influent systems such as flow through filters, industrial water scrubbing systems, brewery pasteurizers, sewage systems (sewage tanks, leach fields, tank lines, sewers, lagoons, and sewage effluent water), industrial air-washing systems equipped with a mist eliminator.

**Treatment Rates**

Initial treatment: When noticeably fouled, add sufficient AMBRICIDE and oxidant to achieve a measured concentration of 0.3 - 5.0 ppm active residual, expressed as total chlorine. The recommended dosage is typically achieved by mixing 2.45 gallons of Sodium Hypochlorite (12.5%) or 2.8 pounds of Chlorine gas with 1 (one) gallon AMBRICIDE.

Subsequent Treatment: Once microbial control is evident, add sufficient AMBRICIDE and oxidant to maintain the measured active residual concentration at 0.3 - 5.0 ppm in process waters, expressed as total chlorine. Continue as in initial dose.
