Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 8660-53

HOW TO USE AS A SEED TREATMENT

This product should be applied in a well ventilated area. Treated seed must not be used for or mixed with food or animal feed, or processed for oil. Treat only those seeds needed for immediate use, minimizing the interval between treatment and planting. Do not store excess treated seeds beyond planting time.

WIREWORM CORN: Immediately before planting, treat seed corn with 25% Lindane Wettable Powder at the rate of 4 ounces per bushel of corn or 2 level tablespoons per corn planter box. The seed and the Lindane should be thoroughly mixed; a small quantity of water (1/4 pint per bushel) may be added to aid in sticking the Lindane to the corn. Plant immediately after treating.

WIREWORM WHEAT, and SORGHUM: Follow directions for treatment of seed corn except use 8 ounces per 100 pounds of wheat and sorghum.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal. Keep container closed and away from food, feedstuffs and domestic water supplies.
PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide spray mixture, or rinsate, is a violation of Federal Law and may contaminate groundwater. If these wastes cannot be disposed of by use according to label instruction, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. **CONTAINER DISPOSAL:** Completely empty container into application equipment. Then dispose of empty container in a sanitary landfill or by incineration, or, if allowed by State or local authorities, by burning. If burned, stay out of smoke.
